

## National Highway Traffic Safety Administration

*Title:* National Automotive Sampling System (NASS)—Tire Pressure Monitoring System Study (TPMSS).

*Type of Request:* Extension of a currently approved collection.

*OMB Control Number:* 2127-0626.

*Affected Public:* Passenger Motor Vehicle Operators.

*Abstract:* The National Automotive Sampling System Tire Pressure Monitoring System Study (TPMSS) is being conducted in support of the rulemaking that requires tire pressure monitoring systems on all new vehicles effective November 2003. The stringent requirement for enactment of the rule requires that the needed data on the frequency and pervasiveness of under-inflation be collected and provided in a short period. This study will assess the extent to which passenger vehicle operators are aware of the recommended air pressure for their tires, if they monitor air pressure, and to what extent actual air pressure differs from that recommended by the vehicle manufacturer. Data will be collected on vehicles equipped with the tire pressure monitoring systems and a set of peer vehicles. The two groups will be compared by extent of under-inflation.

To minimize data collection and training costs and to ensure accuracy of the data, the TPMSS is being conducted as a special study through the infrastructure of the National Automotive Sampling System (NASS). Trained NASS crash investigators will be the data collector for the TPMSS. NASS collects nationally representative data on motor vehicle crashes for the National Highway Traffic Safety Administration (NHTSA). The collection of crash data that support the establishment and enforcement of motor vehicle regulations that reduce the severity of injury and property damage caused by motor vehicle crashes is authorized under the National Traffic and Motor Vehicle Safety Act of 1966 (Public Law 89-563, Title 1, Sec. 106, 108, and 112).
