

Table 18. Assumptions about production adjustments to eliminate <u>L. monocytogenes</u> contamination and associated costs				
Item	HACCP Establishment Size Category			Total
	L	S	VS	
Lines per establishment	6	4	2	NA
Proportion of establishments with no major <u>L. monocytogenes</u> contamination problems by establishment group:				
EG 3	0.95	0.95	0.9	NA
EG 4	0.85	0.85	0.85	NA
Number of establishments				
EG 3	1	13	158	172
EG 4	1	30	67	98
Total	2	44	225	270
Number of establishments incurring a \$2,000 per line costs				
EG 3	0	0	158	158
EG 4	1	14	31	46
Total	1	14	189	204
Number of establishments incurring a major <u>L. monocytogenes</u> contamination problem				
EG 3	0	0	0	0
EG 4	1	14	31	46
Total	1	14	31	46
Number of establishments incurring a severe <u>L. monocytogenes</u> contamination problem				
EG 3	0	0	0	0
EG 4	0	2	4	6
Total	0	2	4	6
Production adjustment Costs	\$thousand			
EG 3	0	0	632.4	632.4
EG 4	77.9	238.7	202.4	519.0
Costs of production adjustments	77.9	238.7	834.8	1,151.4
