On May 28, 2002, we published the court-ordered proposed critical habitat designations for the 101 plant species from Oahu (67 FR 37108). In that proposed rule (beginning on page

37147), we included a detailed summary of the previous Federal actions completed prior to publication of the proposal. We now provide updated information on the actions that we have completed since the proposed

critical habitat designation. In Table 2, we list the final critical habitat designations or nondesignations previously completed for 41 of the 101 plant species from Oahu, which also occur on other islands.
