I. Funding Opportunity Description

This announcement seeks proposals for grants for applied research

addressing AFL program goals related to adolescent premarital sexual relations, pregnancy, and parenthood: Helping adolescents avoid health risk behaviors; ensuring that adolescents have the supports necessary to pursue healthy and productive lives; and strengthening families.

Background

The Adolescent Family Life (AFL) Program was enacted in 1981 as title XX of the Public Health Service Act. The program supports two types of demonstration projects: (1) Prevention demonstration projects to develop, implement, and evaluate programs that provide sexuality education designed to prevent adolescent premarital sexual relations and other health risk behaviors; and (2) care demonstration projects to develop, implement and evaluate interventions (including presenting adoption as an option) with pregnant and parenting adolescents including fathers, their infants, and other family members in an effort to alleviate the negative consequences of adolescent childbearing. The program is also authorized to conduct both basic and applied research on the causes and consequences of adolescent premarital sexual relations, adolescent pregnancy and parenting.

Purposes of the Grant

The purpose of this grant is to expand the research base in a number of areas that are directly applicable to prevention and care program interventions for adolescents. To that end, this announcement invites applications in one or more of the following areas:
