

use of additional test standards. OSHA's current scope of recognition for ITSNA may be found in the following informational Web page: <http://www.osha-slc.gov/dts/otpca/nrtl/its.html>.

OSHA recognition of any NRTL signifies that the organization has met the legal requirements in 1910.7 of title 29, Code of Federal Regulations (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform *independent* safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, employers may use products "properly certified" by the NRTL to meet OSHA standards that require testing and certification.

The Agency processes applications for initial recognition or for expansion or renewal of this recognition following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding and, in the second notice, the Agency provides its final decision on an application. These notices set forth the NRTL's scope of recognition or modifications of this scope. We maintain an informational Web page for each NRTL, which details its scope of recognition. These pages can be accessed from our Web site at <http://www.osha-slc.gov/dts/otpca/nrtl/index.html>.

The most recent notices published by OSHA for ITSNA's recognition covered an expansion of recognition, which became effective on March 25, 2003 (68 FR 14430).

General Background on the Application

ITSNA has submitted an application, dated June 3, 2002 (*see* Exhibit 43), to expand its recognition to use 141 additional test standards. The NRTL Program staff has determined that 94 of the 141 test standards cannot be included in the expansion because they either are not "appropriate test standards," within the meaning of 29 CFR 1910.7(c), or are already included in ITSNA's scope. The staff makes similar determinations in processing expansion requests from any NRTL. Therefore, OSHA would approve 47 test standards for the expansion, which are listed below. Processing of this request was delayed by OSHA, in part, through no fault of the NRTL.

ITSNA seeks recognition for testing and certification of products for demonstration of conformance to the following 47 additional test standards.
