UL 61010C-1 Process Control Equipment

UL 61058-1 Switch for Appliances

**Note:** Testing and certification of gas operated equipment is limited to equipment for use with "liquefied petroleum gas" ("LPG" or "LP-Gas").

OSHA's recognition of ITSNA, or any NRTL, for a particular test standard is limited to equipment or materials (*i.e.*, products) for which OSHA standards require third party testing and certification before use in the workplace. Consequently, any NRTL's scope of recognition excludes any product(s) that fall within the scope of a test standard, but for which OSHA standards do not require NRTL testing and certification.

Many of the UL test standards listed above also are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization (*e.g.*, UL 536) for the standard, as opposed to the ANSI designation (*e.g.*, ANSI/UL 536). Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. (Contact ANSI or the ANSI Web site (<http://www.ansi.org>) and click "NSSN" to find out whether or not a test standard is currently ANSI-approved.)

#### Existing Conditions

Currently, OSHA imposes the following conditions on its recognition of ITSNA. These conditions would apply also to this current expansion. As mentioned in previous notices, these conditions apply solely to ITSNA's NRTL operations and are in addition to any other condition that OSHA normally imposes in its recognition of

an organization as an NRTL. These conditions are listed in this notice mainly for information.

(1) ITSNA may perform safety testing for hazardous location products only at the specific ITSNA sites that OSHA has recognized, and that have been pre-qualified for such testing by the ITSNA Chief Engineer. In addition, all safety test reports for hazardous location products must undergo a documented review and approval at the Cortland testing facility by a test engineer qualified in hazardous location safety testing, prior to ITSNA's initial or continued authorization of the certifications covered by these reports.

(2) ITSNA may not test and certify any products for a client that is a manufacturer or vendor that is either owned in excess of 2% by ITSNA or affiliated organizationally with ITSNA.

#### Preliminary Finding

ITSNA has submitted an acceptable request for expansion of its recognition. As previously mentioned, in connection with the request, OSHA did not perform an on-site review (evaluation) of ITSNA. However, an OSHA NRTL Program assessor reviewed information pertinent to this request and recommended that ITSNA be granted the expansion (*see* Exhibit 45).

Following a review of the application file, the assessor's recommendation, and other pertinent information, the NRTL Program staff has concluded that OSHA can grant to ITSNA the expansion of recognition to include the test standards listed above, subject to the conditions as noted. The staff therefore recommended to the Assistant Secretary that the application be preliminarily approved.

Based upon the recommendations of the staff, the Assistant Secretary has made a preliminary finding that Intertek Testing Services NA, Inc., can meet the requirements as prescribed by 29 CFR 1910.7 for the expansion of recognition, subject to the above conditions. This preliminary finding, however, does not constitute an interim or temporary approval of the applications for ITSNA.

OSHA welcomes public comments, in sufficient detail, as to whether ITSNA has met the requirements of 29 CFR 1910.7 for expansion of its recognition as a Nationally Recognized Testing Laboratory. Your comments should consist of pertinent written documents and exhibits. To consider a comment, OSHA must receive it at the address provided above (*see ADDRESSES*), no later than the last date for comments (*see DATES* above). Should you need more time to comment, OSHA must receive your written request for extension at the address provided above

no later than the last date for comments. You must include your reason(s) for any request for extension. OSHA will limit any extension to 30 days, unless the requester justifies a longer period. We may deny a request for extension if it is frivolous or otherwise unwarranted. You may obtain or review copies of ITSNA's request, the on-site review report, and all submitted comments, as received, by contacting the Docket Office, Room N2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. Docket No. NRTL1-89 contains all materials in the record concerning ITSNA's application.

The NRTL Program staff will review all timely comments and, after resolution of issues raised by these comments, will recommend whether to grant ITSNA's expansion request. The Assistant Secretary will make the final decision on granting the expansion, and in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

#### Notice of Voluntary Termination

ITSNA has requested that OSHA withdraw the recognition of the NRTL's site located in Antioch, California (*see* Exhibit 44). This withdrawal is effective immediately, and OSHA will take no further action on it. OSHA recognized this site for ITSNA on December 1, 1997 (62 FR 63562), although at the time it was located in Pittsburg, California. Under section II.D of Appendix A to 29 CFR 1910.7, OSHA must "inform the public of any voluntary termination by **Federal Register** notice." This action is unrelated to our preliminary finding on the ITSNA expansion request. We include it herein only for convenience in processing.

Signed at Washington, DC, this 11th day of June, 2003.

**John L. Henshaw,**

*Assistant Secretary.*
