

NRTL's scope of recognition or modifications of this scope.

TUV submitted its application to expand its recognition to use 132 additional test standards on October 16, 2001 (see Exhibit 28). The NRTL Program staff has determined that 17 of the 132 standards cannot be included in the expansion because they are not "appropriate test standards," within the meaning of 29 CFR 1910.7(c). The staff makes such determinations in processing expansion requests from any NRTL. Therefore, OSHA is including 115 standards in the expansion, as listed below. OSHA performed an on-site review of the NRTL in June 2002 and recommended the expansion in a memo dated October 17, 2002 (see Exhibit 29).

OSHA published the notice of its preliminary findings on the expansion request in the **Federal Register** on March 4, 2003 (68 FR 10269). The notice requested submission of any public comments by March 19, 2003. OSHA did not receive any comments pertaining to the application.

The previous notice published by OSHA for TUV's recognition covered a renewal of recognition, which became effective on March 18, 2002 (67 FR 12051).

You may obtain or review copies of all public documents pertaining to the TUV application by contacting the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N2625, Washington, DC 20210. You should refer to Docket No. NRTL3-92, the permanent record of public information on TUV's recognition.

The current address of the testing facility (site) that OSHA recognizes for TUV is: TUV Rheinland of North America, Inc., 12 Commerce Road, Newtown, Connecticut 06470.

#### Existing Condition

Currently, OSHA imposes the following condition on its recognition of TUV. This condition is listed first under the "Conditions" section, which is the last section of this notice, and applies also to this expansion for additional test standards. As mentioned in previous notices, such a special condition applies solely to TUV's NRTL operations, and it is in addition to any other condition that OSHA normally imposes in its recognition of any organization as an NRTL.

#### Final Decision and Order

The NRTL Program staff has examined the applications, the on-site review report, and other pertinent information. Based upon this

examination and the assessor's recommendation, OSHA finds that TUV Rheinland of North America, Inc., has met the requirements of 29 CFR 1910.7 for expansion of its recognition to include the additional test standards subject to the limitation and conditions listed below. Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the recognition of TUV, subject to this limitation and these conditions.

#### Limitation

OSHA limits the expansion to testing and certification of products for demonstration of conformance to the following 115 test standards, and OSHA has determined the standards are "appropriate," within the meaning of 29 CFR 1910.7(c).
