

prior notice and comment procedures otherwise required by the section. NOAA finds that prior notice and comment are unnecessary as this rule has a non-substantive effect on the public. This rule corrects an error in a recent amendment to regulations. This error was technical in nature because it was an incorrect citation to another section of the amended and re-numbered regulation. The public is unaffected by the correction. NOAA finds that because of the technical, non-substantive nature of the correction, there is no particular public interest in this rule for which there is need for prior notice and comment. For these reasons, the AA also finds good cause to

waive the 30-day delayed effectiveness requirement of 5 U.S.C. 553(d).
