

were completed. The BLM has conducted various scientific studies on the biological resources of the plan area in cooperation with the North Slope Borough, the State of Alaska and other federal agencies. Information gained since the completion of the Northeast plan has led the BLM to conclude that it is appropriate to consider amending it with two specific objectives in mind: (1) To consider changing the current prescriptive stipulations on existing and future leases into a mixture of prescriptive and performance-based stipulations; and, (2) to evaluate additional lands for exploration and development opportunities that could provide access to new oil discoveries, while remaining sensitive to biological and subsistence values.

Description of the Area: The planning area is composed of those BLM-administered lands, subject to valid existing rights, in the northeastern portion of NPR-A. The northeastern portion of NPR-A is described as beginning on the NPR-A boundary on the township line between T.3 S., R. 5 W. and T. 3 S., R. 6 W., Umiat Meridian (U.M.), and thence northerly along the township lines to the northeast corner of T. 2 N., R. 6 W., U.M., thence westerly along the township line to the right bank of the Ikpihpuk River, thence northerly along the right bank of the Ikpihpuk River to the northern boundary of NPR-A, thence in a generally easterly and southerly direction following the boundary of NPR-A to the point of beginning. This area consists of approximately 4.6 million acres. A large scale map of the plan area (which also serves as the Call map) showing boundaries of the area on a township-by-township basis is available from the Alaska State Office, BLM, 222 West 7th Avenue, Anchorage, AK 99501, telephone (907) 271-3369.

Pursuant to 43 CFR 3131.1 and 3131.2, relevant information related to possible oil and gas leasing is requested for the plan area. Oil and gas companies are specifically requested to nominate within the plan area, areas that they would like to have considered for oil and gas leasing. Nominations must be depicted on the Call map by outlining the area(s) of interest along township lines. Nominators are asked to submit a list of townships nominated to facilitate correct interpretation of their nominations on the Call map. Although the identities of those submitting nominations for oil and gas leasing become a matter of public record, the individual nominations will be held confidential consistent with applicable law.

Nominators also are requested to rank townships nominated for oil and gas leasing according to priority of interest [(e.g., priority 1 (high), 2 (medium), or 3 (low)]. Townships nominated that do not indicate priorities will be considered priority 3. Nominators are encouraged to be specific in indicating townships by priority. Blanket priorities on large areas are not useful in the analysis of industry interest. The telephone number and name of a person to contact in the nominator's organization for additional information should be included in the response.

The regulations at 43 CFR part 3130 limit the size of an oil and gas lease tract within the NPR-A boundaries to no more than 60,000 acres (43 CFR 3130.4-1). Although nominations are to be submitted along township lines, comments are also being sought on the preferred size of tracts for leasing in this area, not to exceed 60,000 acres.
