

TABLE 2.—ESTIMATED ANNUAL RECORDKEEPING BURDEN<sup>1</sup>

21 CFR Section	No. of Recordkeepers	Annual Frequency per Record	Total Annual Records	Hours per Record	Total Hours
800.55(k)	1	1	1	20	20

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

Over the past several years, there has been an average of less than one new administrative detention action per year. Each administrative detention will have varying amounts of data and information that must be maintained. Historically, the Center for Devices and Radiological Health has had very few or no annual responses for this information collection and normally reports one response per year.

FDA's estimate of the burden under the administrative detention provision is based on FDA's discussion with one of the three firms whose devices had been detained.

Dated: June 16, 2003.

### Food and Drug Administration

#### **Food Safety and Security Research—Rapid Methods Development: Availability of Cooperative Agreements; Request for Applications; RFA-FDA-CFSAN-03-1**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA), Center for Food Safety and Applied Nutrition (CFSAN) is announcing the availability of approximately \$3 million in research funds for fiscal year (FY) 2003. These funds will be used to support collaborative research efforts between CFSAN and scientists, and to complement and accelerate ongoing research in four project areas in order to reduce the incidence of foodborne illness and to ensure the integrity of the nation's food supply (including food additives and dietary supplements) and cosmetics. All awards will be subject to the availability of FY 2003 funds.

**DATES:** Submit applications by August 11, 2003.

**ADDRESSES:** Submit completed applications to: Rosemary Springer, Grants Management Specialist, Grants

Management Staff (HFA-520), Division of Contracts and Procurement Management, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-827-7182, e-mail: rspringle@oc.fda.gov. Hand-carried or commercially delivered applications should be sent to: Food and Drug Administration, 5630 Fishers Lane, rm. 2129, Rockville, MD 20857.

Application forms are available either from Rosemary Springer (see previous paragraph) or on the Internet at <http://grants1.nih.gov/grants/funding/phs398/phs398.html>. NOTE: Do not send applications to the Center for Scientific Research (CSR), National Institutes of Health (NIH). Applications mailed to CSR and not received by FDA in time for orderly processing will be returned to the applicant without consideration. Please note that FDA is unable to receive applications electronically.

#### **FOR FURTHER INFORMATION CONTACT:**

*Regarding the administrative and financial management aspects of this notice:* Rosemary Springer (see ADDRESSES section).

*Regarding the programmatic aspects of this notice:* John W. Newland, Research Coordinator, Office of Science (HFS-006), Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD 20740, 301-436-1915, e-mail: [john.newland@cfstan.fda.gov](mailto:john.newland@cfstan.fda.gov).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

FDA is committed to reducing the incidence of foodborne illness to the greatest extent feasible and to protecting the integrity of the nation's food supply. Research in food safety seeks to reduce the incidence of foodborne illness by improving our ability to detect, characterize, and quantitate foodborne pathogens, toxins and chemicals that could jeopardize the safety and security of the food supply, and to find new and improved ways to control these agents. Since 1998, CFSAN has supported multiyear cooperative agreements intended to help achieve the research goals of reducing the incidence of foodborne illness and ensuring the integrity of foods, including food additives and dietary supplements, and

cosmetics. This extramural program supports novel collaborative research efforts between CFSAN and scientists, and leverages expertise not found within CFSAN to complement and accelerate ongoing research. Collaborations such as these provide information critical to food safety guidance and policymaking, help address the needs of CFSAN regulatory programs, stimulate fruitful interactions between FDA scientists and those within the greater research community, and benefit the American public.

In continuation of this effort to help enhance the capabilities of the agency, CFSAN is announcing the availability of research funds for FY 2003 to support research in the following four categories: (1) Development of rapid analytical screening methods for the detection of pathogens that are not usually associated with food and foodborne illness at a contamination level of 100 to 10,000 microbial pathogens/gram (g) of food without pregrowth or selective enrichment; (2) development of PCR-based methods for rapid confirmatory identification of pathogens that are not usually associated with food and foodborne illness; (3) development of rapid screening methods capable of detecting a broad range of nontraditional chemical and toxin adulterants; and (4) development of improved equipment, software, procedures, and/or methods for determining radionuclide contamination in foods.

Approximately \$3 million will be available in FY 2003. FDA anticipates making awards of \$100,000 to \$600,000 (direct plus indirect costs) per award. The research efforts supported by these agreements may be up to 3 years in duration, however the total budget amount will not exceed a one-time amount of \$600,000 (direct plus indirect costs) per award. The project and budget periods of these awards will be the same. Any application received that exceeds the amount stated previously will not be considered responsive and will be returned to the applicant without being reviewed. The number of agreements funded will depend on the availability of Federal funds to support the projects and on the quality of the applications received. There is no
