Application for Manufacturing  
Authority Kvaerner Oilfield Products  
(Undersea Umbilicals) Mobile, AL**

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Mobile, grantee of FTZ 82, requesting manufacturing authority within a proposed general-purpose zone expansion site for the manufacturing and warehousing facilities of Kvaerner Oilfield Products (Kvaerner), located in Mobile, Alabama. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on June 18, 2003.

The Kvaerner facility (50 employees) is located within proposed Site 7 of FTZ 82, the Theodore Industrial Complex, located on the western shore of Mobile Bay. The facility will be used for the manufacturing and warehousing of undersea umbilicals (HTS 8544.60, duty rate 3.5%). Components and materials sourced from abroad (representing 25-35% of all parts consumed in manufacturing) include: super duplex steel tubes, power and signal cables, fiber optic cables and plastic conduits (HTS 7304.10, 7304.21-7304.59, 8544.11-8544.20 and 9001.10, duty rate ranges from .3% to 6.7 %).

FTZ procedures would exempt Kvaerner from Customs duty payments on the foreign components used in export production. The company anticipates that some 50 percent of the plant's shipments will be exported. On its domestic sales, Kvaerner would be able to choose the duty rates during Customs entry procedures that apply to finished umbilicals (3.5%) for the foreign inputs noted above. The request indicates that the savings from FTZ procedures would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ staff has been appointed examiner to investigate the application and report to the Board.
