FEDERAL TRADE COMMISSION

16 CFR Part 305

Rule Concerning Disclosures Regarding Energy Consumption and Water Use of Certain Home Appliances and Other Products Required Under the Energy Policy and Conservation Act (“Appliance Labeling Rule”)

AGENCY: Federal Trade Commission

ACTION: Final rule.

SUMMARY: The Federal Trade Commission (Commission) announces that the current ranges of comparability required by the Appliance Labeling Rule (Rule) for room air conditioners, storage-type water heaters, gas-fired instantaneous water heaters, heat pump water heaters, furnaces, boilers, and pool heaters will remain in effect until further notice.

EFFECTIVE DATE: September 25, 2003.

FOR FURTHER INFORMATION CONTACT: Hampton Newsome, Attorney, Division

of Enforcement, Federal Trade Commission, Washington, DC 20580 (202–326–2889).

SUPPLEMENTARY INFORMATION: The Rule was issued by the Commission in 1979, 44 FR 66466 (Nov. 19, 1979), in response to a directive in the Energy Policy and Conservation Act of 1975.¹ The Rule covers several categories of major household appliances and other consumer products including water heaters (this category includes storage-type water heaters, gas-fired instantaneous water heaters, and heat pump water heaters), room air conditioners, furnaces (this category includes boilers), and central air conditioners (this category includes heat pumps).

The Rule requires manufacturers of all covered appliances and pool heaters to disclose specific energy consumption or efficiency information (derived from the DOE test procedures) at the point of sale

¹ 42 U.S.C. 6294. The statute also requires the Department of Energy (DOE) to develop test procedures that measure how much energy the appliances use, and to determine the representative average cost a consumer pays for the different types of energy available.

in the form of an “EnergyGuide” label and in catalogs. It also requires manufacturers of furnaces, central air conditioners, and heat pumps either to provide fact sheets showing additional cost information, or to be listed in an industry directory showing the cost information for their products. The Rule requires manufacturers to include, on labels and fact sheets, an energy consumption or efficiency figure and a “range of comparability.” This range shows the highest and lowest energy consumption or efficiencies for all comparable appliance models so consumers can compare the energy consumption or efficiency of other models (perhaps competing brands) similar to the labeled model. The Rule also requires manufacturers to include, on labels for some products, a secondary energy usage disclosure in the form of an estimated annual operating cost based on a specified DOE national average cost for the fuel the appliance uses.

Section 305.8(b) of the Rule requires manufacturers, after filing an initial report, to report certain information annually to the Commission by
