**UTAH RECLAMATION MITIGATION
AND CONSERVATION COMMISSION**

**Notice of Availability of the Draft
Environmental Assessment for the
Rehabilitation or Replacement of
Diversion Dams on the Duchesne and
Strawberry Rivers in UT**

AGENCY: Utah Reclamation Mitigation and Conservation Commission.

ACTION: Notice of Availability of the Draft Environmental Assessment for the Rehabilitation or Replacement of Diversion Dams on the Duchesne and Strawberry Rivers in Utah.

SUMMARY: The Central Utah Project Completion Act (Pub. L. 102-575) authorized federal funds to rehabilitate diversion dams on the Duchesne and Strawberry Rivers in Utah. The project is needed to reduce adverse affects on fish and wildlife resources.

The Draft Environmental Assessment (DEA) was prepared as a Programmatic document. It discusses potential environmental impacts associated with reconstructing and operating an unspecified diversion dam on the Duchesne or Strawberry River. The new diversion dam could serve single or multiple diversion rights. Potential environmental impacts addressed in the document are those impacts that would be expected regardless of which diversion dam is rehabilitated. Potential impacts to wetlands, threatened and endangered species, and cultural resources are generally site specific and/or require special permits. Potential impacts to these environmental disciplines would be addressed in a Supplemental Environmental Assessment, if needed.

The DEA provides the public and decision makers information to understand and evaluate potential environmental consequences. The DEA was developed with the public in accordance with the Commissions National Environmental Policy Act (NEPA) Rule (43 CFR part 10010.20).

The DEA is related to other potential future actions, specifically the detailed design and implementation of diversion dam replacements or rehabilitation. The programmatic perspective has been considered in the document. Future
