ACTION: Final rule; approval of amendment.

SUMMARY: We are approving, with one exception, a proposed amendment to the West Virginia surface coal mining regulatory program (the West Virginia program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). The program amendment consists of changes to the Code of West Virginia (W. Va. Virginia's Surface Mining Reclamation Regulations at CSR 38-2 as contained in House Bill 2603. The amendment concerns a variety of topics including bond release, dam safety, permit application requirements, drainage and sediment control systems, fish and wildlife considerations, revegetation, performance standards, inspection and enforcement, coal refuse, and performance standards applicable to remining operations. I. Background on the West Virginia Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its program includes, among other things, " * * * a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of the Act * * * ; and rules and regulations consistent with regulations issued by the Secretary pursuant to the Act." See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the West Virginia program on January 21, 1981. You can find background information on the West Virginia program, including the Secretary's findings, the disposition of comments, and conditions of approval of the West Virginia program in the January 21, 1981, **Federal Register** (46 FR 5915).
