

implementation strategies for effective infrastructure development as defined by the consensus-based Association of State and Territorial Dental Directors (ASTDD) model. The results would be used to structure flexible guidelines for infrastructure development and identify high-priority activities enabling additional sites to efficiently plan and implement cost-effective oral health improvement activities. Additionally, this project will assist in the development of objectives and indicators of sustainability—the ability of these demonstration programs to

meet the needs of their constituents beyond the seed-funding period.

The objectives of the uniform evaluation tracking reporting system are to:

1. Evaluate infrastructure development activity characteristics among the funded sites.
2. Synthesize progress and promote cross-collaboration among grantees.
3. Make progress indicators available to nonfunded sites.
4. Promote positive infrastructure growth among funded and nonfunded sites.

The above objectives will be attained through a family of uniform evaluation reporting documents designed to evaluate demographic, extent, and culture climate of infrastructure development activities. One respondent from each site will be required to submit the activity-tracking document annually. Participation is mandatory for funded sites. Nonfunded sites actively involved in infrastructure development are welcome to submit tracking information to further provide information for all sites. Participation is not mandatory for nonfunded sites.
