Part I: Background

The purpose of this program announcement is to increase rates of refugee employment and decrease rates of refugee welfare utilization by providing earned income subsidies to enable refugees who have experienced long-term difficulties, or who are likely to experience long-term difficulties, in assimilating into American communities with positive workforce experiences. These projects are intended to assist refugees: (1) Who have experienced long-term difficulties in assimilating into American communities or (2) who are likely to experience long-term difficulties in assimilation, including recently arrived refugees with conditions described below, older refugees, refugees with disabilities or chronic illnesses, and youth who are not enrolled in school and have little or no family support structure. These grants will provide opportunities for subsidized and unsubsidized job placements that will lead to permanent employment and economic self-sufficiency. Economic self-sufficiency contributes significantly to successful integration.

Projects funded under this announcement are intended to assist communities across this country with concentrations of refugees, many of whom entered the United States over a decade ago, who continue to experience difficulty integrating into their communities and achieving economic self-sufficiency. For some of these refugees, language skills, cultural barriers, the lack of financial resources, and years of relying on public assistance have resulted in isolating them from the mainstream, limiting their employment opportunities, and hindering their integration into American communities. Their low rate of assimilation has been documented in many localities on such key indicators as poverty levels, welfare utilization, car and home ownership, high school completion, college attendance or graduation, English language fluency, employment rates, household income, per capita income, and naturalization rates.

Projects funded under this announcement are also intended to assist communities with more recently arrived refugees who are likely to experience long-term unemployment and difficulties in assimilating. For instance, some refugees experience difficulties in employment and
