

Please include the docket number (DI03-4-000) on any comments or motions filed.

k. *Description of Project:* The proposed run-of-river Watterson Hydroelectric Project would consist of: (1) A diversion structure using a 2-foot-by-2-foot hydroscreen; (2) a 6-inch-diameter, 3,100-foot-long pipeline; (3) a Pelton-wheel turbine with a rated capacity of 12 kW, and an inverter which will store the power in batteries; and (4) appurtenant facilities. The project will not be connected to the local utility or any other power company, or transmission grid.

When a Declaration of Intention is filed with the Federal Energy Regulatory Commission, the Federal Power Act requires the Commission to investigate and determine if the interests of interstate or foreign commerce would be affected by the project. The Commission also determines whether or not the project: (1) Would be located on a navigable waterway; (2) would occupy or affect public lands or reservations of the United States; (3) would utilize surplus water or water power from a government dam; or (4) if applicable, has involved or would involve any construction subsequent to 1935 that may have increased or would increase the project's head or generating capacity, or have otherwise significantly modified the project's pre-1935 design or operation.
