(l) *State licensed or admitted insurers.* For a State licensed or admitted insurer that reports to the NAIC, direct earned premium is the premium information for commercial property and casualty insurance coverage reported by the insurer on column 2 of the NAIC Exhibit of Premiums and Losses of the Annual Statement (commonly known as Statutory Page 14). (See definition of property and casualty insurance).

(i) Premium information as reported to the NAIC should be included in the calculation of direct earned premiums for purposes of the Program only to the extent of commercial property and casualty coverage issued by the insurer against an insured loss under the Program.

(ii) Premiums for personal property and casualty insurance coverage (coverage primarily designed to cover personal, family or household risk exposures, with the exception of coverage written to insure 1 to 4 family rental dwellings owned for the business purpose of generating income for the property owner) or for insurance coverage for any loss that would not be an insured loss under the Program, should be excluded in the calculation of direct earned premiums for purposes of the Program.

(iii) Personal property and casualty insurance coverage that includes incidental coverage for commercial purposes is primarily personal coverage, and therefore premiums may be fully excluded by an insurer from the calculation of direct earned premium. For purposes of the Program, commercial coverage is incidental if less than 25 percent of the total direct earned premium is attributable to commercial coverage. Property and casualty insurance coverage for any loss that would not be an insured loss under the Program that includes incidental coverage for an insured loss under the Program is primarily non-Program coverage, and therefore premiums may be fully excluded by an insurer from the calculation of direct earned premium. For purposes of the Program, coverage for an insured loss is incidental if less than 25 percent of the total direct earned premium is attributable to such coverage.

(iv) If a property and casualty insurance policy covers both commercial and personal risk exposures, insurers may allocate the premiums in accordance with the proportion of risk between commercial and personal components in order to ascertain direct earned premium. If a property and casualty insurance policy covers risk exposures for both insured losses and losses that would not be insured losses under the Program, insurers may allocate the premiums in accordance with the proportion of risk between the insured loss and non-insured loss components in order to ascertain direct earned premium.
