

DATES: Comments on the proposed rule will be accepted until February 27, 2003.

ADDRESSES: Mail or fax written comments about this extension or the proposed rule to Michael L. Grable. The mailing address is: Michael L. Grable, Chief, Financial Services Division, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3282. The fax number is (301) 713-1306. NMFS will not accept e-mail or internet comments.

If a comment involves any aspect of the proposed rule's collection of information requirements, send the comment both to Michael L. Grable and to the National Oceanic and Atmospheric Administration Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503. Anyone may obtain, from Michael L. Grable, the Environmental Assessment, Regulatory Impact Review, and Initial Regulatory Flexibility Analysis for this proposed rule.

Anyone wishing to contact the Restricted Access Management Program (which issues crab species fishing licenses) may do so at this address: Restricted Access Management Program, National Marine Fisheries Service, P.O. Box 21668, Juneau AK 99802-1668. The fax number is (907) 586-7354.

FOR FURTHER INFORMATION CONTACT: Michael L. Grable, (301) 713-2390

SUPPLEMENTARY INFORMATION:

Background

On December 12, 2002 (67 FR 76329), NMFS published a proposed rule in the **Federal Register** that would implement regulations for a program to reduce excess capacity and promote economic efficiency in the crab fishery under the FMP. NMFS would finance the voluntary program's \$100 million cost with a 30-year loan to be repaid by post-reduction fishermen. The proposed rule was corrected in the **Federal Register** on December 30, 2002 (67 FR 79550).

The deadline for comments on the proposed rule was January 27, 2003, and January 29, 2003 on the correction. This extension of the comment period until February 27, 2003 is in response to requests made by the public. Moreover, as the Bering Sea and Aleutian Islands C. opilio fishery was open during part of the original comment period, NMFS notes that an extension of comment period would give these members of the affected public a better chance to comment on the rule.

Authority: 16 U.S.C. 1801 et. seq.

Dated: January 23, 2003.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[ID.010303C]

Fisheries Off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of three exempted fishing permits (EFP) applications; request for comments.

SUMMARY: NMFS announces the receipt of three EFP applications from the Washington State Department of Fish and Wildlife. If awarded, these EFPs would allow vessels with valid Washington State delivery permits to harvest and retain federally managed groundfish in closed rockfish conservation areas and to retain federally managed groundfish species in excess of cumulative trip limits. These activities are otherwise prohibited. Vessels fishing under these EFPs will be required to carry either a State-sponsored sampler or a Federal observer while conducting EFP fishing. Samplers/observers will collect catch and effort data and retain specimens from catch that is generally discarded at sea and is otherwise not available at the shoreside processing facility. These EFP proposals are intended to promote the objectives of the Pacific Coast Groundfish Fishery Management Plan (FMP) by providing much needed data on total catch and incidental catch rates by fishing strategy.

DATES: Comments must be received by February 12, 2003.

ADDRESSES: Copies of the EFP applications are available from Becky Renko Northwest Region, NMFS, 7600 Sand Point Way N.E., Bldg. 1, Seattle, WA 98115-0070.

FOR FURTHER INFORMATION CONTACT: Becky Renko (206) 526-6110 or Carrie Nordeen (206) 526-6144.

SUPPLEMENTARY INFORMATION: This action is authorized by the FMP and

implementing regulations at 50 CFR 600.745 and 50 CFR 660.350.

On December 12, 2002, NMFS received three completed EFP applications from the Washington State Department of Fish and Wildlife. The primary purpose of the exempted fishing activity is to measure bycatch rates for overfished and other rockfish species associated with the fishing strategies currently used to harvest dogfish shark, walleye pollock, and arrowtooth flounder.

Each EFP requires that the participating vessels carry a State-sponsored sampler or Federal groundfish observer to collect data from which incidental catch rates and total catch of various species and species groups can be estimated. Samplers/observers would also collect and retain specimens, that may not be kept under current regulations. Because the retention of such fish is prohibited by Federal regulations, an EFP is needed to allow State-sponsored samplers to retain these specimens. To the extent possible, data provided by the State-sponsored samplers will be compatible with that collected by the NMFS coastwide observer program. The information gathered through these EFPs may lead to future rulemakings.

At the Pacific Fishery Management Council's (Council) November 2002, meeting in Foster City, CA, the applicants presented the EFP applications. The Council considered the applications and recommended that NMFS issue the EFPs for the proposed activity. All EFP harvests are expected to be within set asides optimum yields (OYs) for 2003 EFP harvests and, therefore, no OY is expected to be exceeded. Copies of the applications are available for review from NMFS (see **ADDRESSES**).

Spiny Dogfish (*Squalus acanthias*)

Spiny dogfish is an abundant and important species in the groundfish fishery off Washington State. Fixed gear is used to directly harvest spiny dogfish. For 2003, fishing with fixed gear in areas where spiny dogfish have historically been harvested will be prohibited because the areas fall within the Non-trawl Rockfish Conservation Area. Rockfish conservation areas are large-scale depth-related areas where low abundance groundfish species are commonly found. Little is known about the bycatch catch rates of other groundfish, including overfished species, by vessels specifically targeting spiny dogfish. However, fishers believe that spiny dogfish can be harvested with much lower bycatch rates than are currently assumed.
