Title: Section 73.61, AM Directional Antenna Field Strength Measurements.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business and other for-profit entities.

Number of Respondents: 1,890.

Total Annual Burden: 36,020 hours.

Total Annual Costs: None.

Needs and Uses: 47 CFR 73.61 requires each AM station using directional antennas to make field strength measurement as often as necessary to ensure proper directional antenna system operation. Stations not having approved sampling systems make field strength measurements every three months. Stations with approved sampling systems must take field strength measurements as often as

necessary. Also, all AM station using directional signals must take partial proofs of performance as often as necessary. The FCC staff used the data in field inspections/investigations; AM licensees with directional antennas use the data to ensure that adequate interference protection is maintained between stations and to ensure proper operation of antennas.
