

bass population has recovered to a point where further examination of whether this fishery should occur in the EEZ is appropriate. There are expectations among a number of fishing industry stakeholders that their past sacrifices would result in future opportunities to harvest striped bass, and therefore, there are potential credibility issues associated with keeping the EEZ closed, especially in light of the current status of the Atlantic striped bass stock.

(5) The recommendation to open the EEZ is part of Amendment 6 which incorporates new management standards to ensure stock conservation including targets and thresholds for both mortality and spawning stock biomass. Fishing mortality is currently below the target level, and spawning stock biomass is 1.5 times the target level.

(6) Amendment 6 includes monitoring requirements and triggers that will

allow the Commission to respond quickly to increased mortality.

(7) The bulk of the public comment (greater than 75 percent) received in opposition cited expansion of the commercial fishery as rationale not to open the EEZ. The Commission believes the rationale is incorrect because the commercial fishery is controlled by a hard quota.

The Commission stated that its Atlantic Striped Bass Technical Committee would monitor annually the Atlantic striped bass population, and, if at some point in the future the Commission determines that the Atlantic striped bass population is overfished or that overfishing is occurring, it may recommend further management measures for the EEZ.

NMFS is considering proposed rulemaking to revise the Federal Atlantic striped bass regulations to be compatible with Amendment 6 and is

seeking comments on implementation of the Commission's recommendations in the EEZ. After review of comments received from this notice, NMFS will decide whether to initiate a lengthy review and decision-making process, which would include preparation of either an Environmental Impact Statement or an Environmental Assessment, and the development of management measures to revise current Federal regulations for Atlantic striped bass in the EEZ.
