

- Digital Q3 Flood Data files, which FEMA developed by scanning the published FIRM and vectorizing a thematic overlay of flood risks;
- Digital Q3 Flood Data files for Coastal Barrier Resource Areas (CBRA Q3 Flood Data files);
- Community Status Book, which is a report generated by FEMA's Community Information System database that provides pertinent map status information for all identified communities;
- Flood Map Status Information Service (FMSIS), through which FEMA provides status information for effective NFIP maps;
- Letter of Map Change (LOMC) Subscription Service, through which FEMA makes certain types of LOMCs available biweekly on CD-ROM;
- NFIP Insurance Manual (Full Manual), which provides vital NFIP information for insurance agents nationwide;
- NFIP Insurance Manual (Producer's Edition), which is used for reference and training purposes;
- Community Map Action List (CMAL), which is a bimonthly list of communities and their NFIP status codes;

- Maps on the Web—raster images of the FIRMs and Floodways in TIFF format;
- FIS on the Web—raster images of FIS in PDF format;
- Maps on CDs—includes only the raster images of the maps and can be purchased by panel or in community, county, or State kits;
- F-MIT Light on the Web—a free downloadable flood map image view tool, to be used in conjunction with viewing TIFF images, that supports panning, zooming, and creating a “firmette”. A firmette is a user-defined “cut-out” section of the map at 100% map scale designed for printing on a standard office printer;
- F-MIT Light on CD—same as F-MIT Light on the Web, designed for use with the Flood Map CD without a Database; and
- FEMA's *Guidelines and Specifications for Flood Hazard Mapping Partners on CD*: This document combines previous FEMA publications, guidance documents, and memorandums regarding Flood Hazard Mapping. The Guidelines reflect recent changes to processes and products associated with the implementation of the Map Modernization Program,

including the Cooperating Technical Partners initiative, new Project Scoping procedures, and DFIRM specifications.

The MSC is now adding two new products, which are denoted by an asterisk in the table. The following is a description of the MSC's new products:

- Community or County Databases—a digital version of the maps that is designated for use with Geographic Information Systems (GIS) software to allow users to access, view, and analyze mapping information using specialized data; and

- FMIT Pro on CD—a view and address look up tool designed for use with the community or county databases.

For more information on the map and insurance products available from the MSC, we invite interested parties to visit our MSC Web site at <http://www.msc.fema.gov/>.

There are no changes in the processing fees or shipping costs for any of the other products that the MSC distributes. Federal, State, and local governments continue to be exempt from paying fees for the map products. The fee schedules for the current and new products are shown in the table below.
