[A-570-888]

Notice of Initiation of Antidumping Investigation: Floor-Standing, Metal-Top Ironing Tables and Certain Parts Thereof from the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Initiation of Antidumping Investigation

EFFECTIVE DATE: July 25, 2003.

FOR FURTHER INFORMATION CONTACT: Paige Rivas or Sam Zengotitabengoa, AD/CVD Enforcement Office IV, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230; telephone: (202) 482-0651 or (202) 482-4195, respectively.

INITIATION OF INVESTIGATION:

The Petition

On June 30, 2003, the Department of Commerce (the Department) received a *Petition for the Imposition of Antidumping Duties on Floor-Standing, Metal-Top Ironing Tables and Certain Parts Thereof from the People's Republic of China (the petition)*, filed in proper form, by Home Products International, Inc. (the petitioner). The Department received information supplementing the petition on July 2, 2003, and July 8, 2003.

In accordance with section 732(b) of the Tariff Act of 1930 (the Act), as amended by the Uruguay Round Agreements Act, the petitioner alleges that imports of floor-standing, metal-top ironing tables and certain parts thereof (ironing tables) from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Act, and that such imports are materially injuring, or are threatening to materially injure, an industry in the United States.

The Department finds that the petitioner filed this petition on behalf of the domestic industry because it is an interested party as defined in section 771(9)(C) of the Act and has demonstrated sufficient industry support with respect to the antidumping investigation that it is requesting the Department to initiate. *See Determination of Industry Support for the Petition* section below.

Period of Investigation

The anticipated period of investigation (POI) for this investigation is October 1, 2002, through March 31, 2003.

Scope of Investigation

For purposes of this investigation, the product covered consists of floor-standing, metal-top ironing tables, assembled or unassembled, complete or incomplete, and certain parts thereof. The subject tables are designed and used principally for the hand ironing or pressing of garments or other articles of fabric. The subject tables have full-height leg assemblies that support the ironing surface at an appropriate (often adjustable) height above the floor. The subject tables are produced in a variety

of leg finishes, such as painted, plated, or matte, and they are available with various features, including iron rests, linen racks, and others. The subject ironing tables may be sold with or without a pad and/or cover. All types and configurations of floor-standing, metal-top ironing tables are covered by this investigation.

Furthermore, this investigation specifically covers imports of ironing tables, assembled or unassembled, complete or incomplete, and certain parts thereof. For purposes of this investigation, the term "unassembled" ironing table means product requiring the attachment of the leg assembly to the top or the attachment of an included feature such as an iron rest or linen rack. The term "complete" ironing table means product sold as a ready-to-use ensemble consisting of the metal-top table and a pad and cover, with or without additional features, e.g. iron rest or linen rack. The term "incomplete" ironing table means product shipped or sold as a "bare board" i.e., a metal-top table only, without the pad and cover- with or without additional features, e.g. iron rest or linen rack. The major parts or components of ironing tables that are intended to be covered by this investigation under the term "certain parts thereof" consist of the metal top component (with or without assembled supports and slides) and/or the leg components, whether or not attached together as a leg assembly. The investigation covers separately shipped metal top components and leg components, without regard to whether the respective quantities would yield an exact quantity of assembled ironing tables.
