

TABLE 4.—PRODUCT REREGISTRATION ACTIONS COMPLETED DURING FY 2002

Product reregistration actions	77
Product amendment actions	51
Product cancellation actions	186
Total actions	314

2. *Status of the product reregistration universe.* The status of the universe of pesticide products subject to reregistration at the end of FY 2002 is shown in Table 5 below. This overall status information is not “cumulative”—it is not derived from summing up a series of annual actions. Adding annual actions would result in a larger overall number since each individual product is subject to multiple actions—it can be amended, reregistered, and/or canceled, over time. Instead, the “big picture” status information in Table 5 should be considered a snapshot in time. As registrants and EPA make marketing and regulatory decisions in the future, the status of individual products may change, and numbers in this table are expected to fluctuate.

TABLE 5.—STATUS OF THE UNIVERSE OF PRODUCTS SUBJECT TO PRODUCT REREGISTRATION, FOR FY 2002 (AS OF SEPTEMBER 30, 2002)

Products reregistered	1,637
Products amended	345
Products canceled	3,806
Products sent for suspension	12
Total products with actions completed	5,800
Products with actions pending	2,817
Total products in product reregistration universe	8,617

The universe of 8,617 products in product reregistration at the end of FY 2002 represented an increase of 745 products from the FY 2001 universe of 7,872 products. The increase consists of 324 products associated with FY 2002 REDs, and 412 products associated with IREDs, plus 9 products that were added as a result of DCI activities and processing for several previously issued REDs and IREDs.

At the end of FY 2002, 2,817 products had product reregistration decisions pending. Some pending products await science reviews, label reviews, or reregistration decisions by EPA. Others are not yet ready for product reregistration actions; they are associated with more recently completed REDs, and their product-specific data are not yet due to be submitted to or reviewed by the Agency. EPA's goal is to complete 400–450 product reregistration actions during fiscal year 2003.

### C. Number and Type of DCIs to Support Product Reregistration by Active Ingredient

1. *DCIs for REDs.* The number and type of data call-in requests or DCIs that EPA is preparing to issue under FIFRA section 3(c)(2)(B) to support product reregistration for pesticide active ingredients included in FY 2002 REDs are shown in Table 6. Starting in FY 2001, for the first time, OMB clearance has been required to issue REDs and IREDs. Since the Fenamiphos and (HOCH<sub>2</sub>-)methylthiocarbamate REDs consisted of voluntary cancellations, products containing these pesticides will not be reregistered and therefore do not require DCIs.

TABLE 6.—DCIs PREPARED TO SUPPORT PRODUCT REREGISTRATION FOR FY 2002 REDS

Case Number	Case Name	Number of Products Covered by the RED <sup>1</sup>	Number of Product Chemistry Studies Required <sup>2</sup>	Number of Acute Toxicology Studies Required <sup>3</sup>	Number of Efficacy Studies Required
3030	1,4-Bis(bromoacetoxy)-2-butene	2	22	12 (6 studies x 2 products)	--
0014	Endosulfan	98 (includes 4 SLN products)	22	102 (7 batches/10 not batched)	0
0333	Fenamiphos (Voluntary Cancellation)	15	N/A	N/A	N/A
3076	(HOCH <sub>2</sub> -)methylthiocarbamate (Voluntary Cancellation)	0	N/A	N/A	N/A
0315	Lindane	29	22	126 (5 batches/16 not batched)	0
2490	Oxyfluorfen	117 (includes 8 SLN products)	22	60 (4 batches/6 not batched)	0
2670	Thiabendazole	63	22	144 (4 batches/20 not batched)	0

<sup>1</sup>The number of registered products containing a pesticide active ingredient can change over time. The number of products that appears in the RED document (counted when the RED is signed) may be different than the number of products that EPA is tracking for product reregistration (counted later, when the RED is issued). This table reflects the final number of products associated with each RED, as they are being tracked for product reregistration.

<sup>2</sup>This column shows the number of product chemistry studies that are required for each product covered by the RED.
