*F. Applications for Registration
Requiring Expedited Processing;
Numbers Approved and Disapproved*

By law, EPA must expedite its processing of certain types of applications for pesticide product registration, i.e., applications for end use products that would be identical or substantially similar to a currently registered product; amendments to current product registrations that do not require review of scientific data; and products for public health pesticide uses. During FY 2002, EPA considered and approved the numbers of applications for registration requiring expedited processing (also known as "fast track" applications) shown in Table 11.

TABLE 11.—FAST TRACK
APPLICATIONS APPROVED IN FY 2002

Me-too product registrations/Fast track	368
Amendments/Fast track	3,466
Total applications processed by expedited means	3,834

Regarding numbers of applications disapproved, instead the Agency generally notifies the registrant of any deficiencies in the application that need to be corrected or addressed before the application can be approved. Applications may have been withdrawn after discussions with the Agency, but none were formally "disapproved" during FY 2002.

On a financial accounting basis, EPA devoted approximately 28.7 full-time equivalents (FTEs) in FY 2002 to reviewing and processing applications for fast track me-too product registrations and label amendments. The Agency spent approximately \$2.87 million in FY 2002 in direct costs (i.e., time on task, not including administrative expenses, computer systems, management overhead, and other indirect costs) on expedited processing and reviews.

G. Future Schedule for Reregistrations

During the past several years, EPA has been conducting reregistration in

conjunction with tolerance reassessment under FFDCA. That law requires the Agency to reassess all existing tolerances over a 10-year period to ensure consistency with the new safety standard, and to consider pesticides that appear to pose the greatest risk first. In prioritizing pesticides for reregistration eligibility review and tolerance reassessment, EPA is continuing to consider their potential risks, as reflected in the Agency's tolerance reassessment schedule published in the **Federal Register** on August 4, 1997. EPA is giving highest priority to pesticides in Group 1, including the OP pesticides, and the carbamates, organochlorines, and B2 (probable human) carcinogens.

1. *RED, IRED, and TRED Candidate Pesticides for FY 2003.* List 4 contains candidate pesticides for Reregistration Eligibility Decisions (REDs), Interim REDs (IREDs), and Reports on FQPA Tolerance Reassessment Progress and Interim Risk Management Decisions (TREDs) in FY 2003. As in previous years, any pesticides for which decisions are not completed during FY 2003 will automatically become candidates for decisions in FY 2004.

*H. Projected Year of Completion of
Reregistrations*

EPA is now conducting reregistration in conjunction with tolerance reassessment, which FFDCA mandates be completed by August 2006. EPA plans to complete reregistration of pesticide active ingredients with tolerances and as many others as possible in meeting the statutory deadline for completing tolerance reassessment.
