**Title:** NESHAP for Shipbuilding and Ship Repair Facilities (Surface Coating) (40 CFR part 63, subpart II) (OMB Control Number 2060-0330, EPA ICR Number 1712.04). This is a request to renew an existing approved collection that is scheduled to expire on August 31, 2003. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

**Abstract:** The respondents are owners or operators of Shipbuilding and Ship Repair Facilities. Operations covered include: primer and top coat application in manufacturing processes and in ship repair processes. The NESHAP regulation 40 CFR part 63, subpart II, was promulgated on December 15, 1995. In order to ensure compliance with the standards adequate record keeping and reporting is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

These standards rely on the reduction of Hazardous Air Pollutant (HAP) emissions by using coatings which comply with the volatile organic compound (VOC) limits set forth in this Maximum Achievable Control Technology (MACT) standard. In some cases, the control of emissions of HAP from surface coating at shipbuilding and repair facilities also requires the installation of properly designed equipment, and the operation and maintenance of that equipment. The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. The implementation plans from facilities are needed as these are the Agency's record of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. In addition, the semiannual reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations. Record keeping and reporting are mandatory under this regulation. Records must be maintained for 5 years.
