

(1) The President shall convene a Commission consisting of the Executive Director of Business and two (2) other non-interested Executive Directors to hear the license holder's case for not suspending or revoking his or her license. Such hearing will be held within thirty (30) days of receipt by the Department of Business of the request for a hearing.

(2) The license holder shall be permitted to present evidence to the Commission with respect to her or his compliance with this Ordinance and other applicable law.

(3) The Commission shall make a decision considering such evidence it deems relevant. The decision to suspend/revoke the license or dismiss the complaint shall be issued within three (3) days following the hearing.

(4) A decision to either suspend or revoke the holder's license shall take effect immediately at the close of the business day of the decision.

(5) The decision by the Commission shall be final.

6. *Approval.* This Ordinance shall be effective upon certification by the Assistant Secretary—Indian Affairs, Department of the Interior, and publication in the **Federal Register**.

BILLING CODE 4310-4J-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY-100-03-1310-DB]

Notice of Intent to Conduct Scoping and Prepare an Environmental Impact Statement for the South Piney Natural Gas Development Project, Sublette County, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent (NOI) to conduct public scoping and prepare an Environmental Impact Statement (EIS) for the South Piney Natural Gas Development Project, Sublette County, Wyoming.

SUMMARY: Infinity Oil and Gas of Wyoming, Inc. (Infinity) and Williams Production RMT Company (Williams, and hereinafter referred to collectively as "the Companies") have submitted to the Bureau of Land Management (BLM) a proposal to develop Federal natural gas resources. The South Piney Natural Gas Development Project is located in the area known as South Piney, which is located in Sublette County, Wyoming. Under the provisions of section 102(2)(C) of the National Environmental

Policy Act (NEPA) and pertinent Federal regulations, the BLM announces its intentions to prepare an EIS, and solicit public comments regarding issues and resource information pertaining to this proposed project.

DATES: This notice initiates the public scoping process. The BLM can best use public input if comments and resource information are submitted within 60 days of the publication of this notice. In addition, a scoping notice will be distributed by mail on, or about, the date that this notice is published in the **Federal Register**. Additional information, and a copy of the scoping notice may be obtained by writing, or visiting, the BLM Field Office listed below.

The BLM will be soliciting representatives from affected interests and stakeholders to participate in the environmental analysis process. In addition, the BLM will host a public meeting within 60 days of the publication of this notice. All comments received at the public meeting or submitted in writing by mail will aid the BLM in identifying issues, developing a range of alternatives, and analyzing environmental impacts. The BLM will announce public meetings and comment periods through local news media and/or the Pinedale Field Office Web site (<http://www.wy.blm.gov/pfo/info.htm>), at least 15 days prior to the event. The BLM will also provide additional opportunities for public participation throughout the preparation of the EIS.

ADDRESSES: Comments should be submitted in writing to: Field Manager, Bureau of Land Management, Pinedale Field Office, 432 East Mill Street, PO Box 768, Pinedale, Wyoming 82941.

FOR FURTHER INFORMATION CONTACT: Bill Lanning, Project Manager, BLM, Pinedale Field Office, PO Box 768, Pinedale, Wyoming 82941, telephone 307-367-5300.

SUPPLEMENTARY INFORMATION: In July 2002, the Companies submitted to the BLM a proposal to develop natural gas resources in the South Piney area. The total project area includes approximately 31,230 acres, of which approximately 15,440 acres are comprised of Federal surface and mineral estate managed by BLM; 1,760 acres of State of Wyoming surface and minerals; and 14,030 acres of private surface ownership. Of the 14,030 acres of private surface ownership, 11,413 acres are "split estate" (private surface/Federal minerals) lands, with the remaining 2,617 acres of mineral estate in private ownership.

The South Piney Natural Gas Development Project area is located in the southwest corner of Sublette County, approximately 12 miles west of Big Piney-Marbleton, 18 miles northwest of LaBarge, and approximately 28 miles southwest of Daniel, Wyoming. Drilling is proposed in Townships 29 and 30 North, Range 114 West, 6th Principal Meridian. Access to the project area is from U.S. Highway 189, Wyoming Highway 350, Sublette County Road No. 23-142, and existing roads and two-track trails in the overall project area.

The Companies propose to drill a minimum of 100 to a maximum of 210 natural gas wells within the overall project area. Infinity intends to drill wells to a maximum depth of approximately 5,000 feet to recover coalbed methane from the Upper Cretaceous Mesaverde Formation. Williams plans to drill wells to a maximum depth of 10,000 feet to recover natural gas from the Frontier Formation. The project area currently has five wells producing from coal seams in the Mesaverde Formation, one well currently producing from the Frontier Formation, one water disposal well, and four shut-in/temporarily abandoned deep Madison Formation gas wells. Williams drilled two additional Frontier Formation wells in Fall 2002.

The Companies' proposal includes a drilling program based on a 160-acre spacing pattern (four wells per section) for both the Mesaverde and Frontier Formations. The Companies have a joint interest in approximately 9,680 acres, and development in this area may result in the drilling of up to eight wells per section (four wells to the Mesaverde Formation and four wells to the Frontier Formation on a common or shared 160 acre spacing pattern). The remainder of the overall project area would see either Mesaverde or Frontier Formation development at a density of four wells per section.

The proposed gas field development would include the following associated structures and facilities:

1. Each well location would have a separator, dehydrator, and produced water storage tanks. Infinity's Mesaverde Formation well locations would require a surface-pumping unit for dewatering the Mesaverde coals. Infinity anticipates the need to install up to 20 central production facilities (production pods) within the overall project area. These production facilities would collect and compress methane produced from wells in the well field, as well as collect and dispose of produced water.
