

(OMB) to reinstate approval for VMS information collection under the provisions of the Paperwork Reduction Act. A notice regarding this collection was published in the **Federal Register** on November 18, 2002 (67 FR 69506). The second notice of OMB review was published in the **Federal Register** on March 19, 2003 (68 FR 13280). OMB approved the VMS information collection request on May 10, 2003.

The placement of VMS units on fishing vessels in this fishery will enable NMFS to determine vessel locations and will complement the Agency's efforts to monitor and enforce compliance with applicable regulations. NMFS originally published an amendment of effective date on June 25, 2003 (68 FR 37772), to notify fishermen of its intent to have the VMS requirement (50 CFR 635.69(a)) be effective on September 1, 2003, and to provide fishermen approximately 60 days to purchase and install VMS to come into compliance. At that time, NMFS notified affected fishermen of the intended September 1, 2003, effective date via the HMS fax notice, NMFS' electronic newsletter, and the HMS web page. NMFS also mailed the fax notice and information regarding approved VMS units and service providers to permit holders during the month of July. This final rule reinstates § 635.69 effective September 1, 2003.

Classification

This action is published under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. The Assistant Administrator (AA) has determined that implementation of a VMS program in the pelagic longline fishery is necessary to monitor and enforce closed areas implemented to reduce bycatch. The AA finds that good cause exists to waive the requirement to provide prior notice and the opportunity for comment, pursuant to authority set forth at 5 U.S.C. 553(b)(B), as such procedures would be unnecessary and contrary to the public interest. This action establishes a new effective date for the HMS VMS rule, which had been suspended due to litigation. NMFS provided for prior notice and comment before promulgating the HMS VMS rule in 1999, then provided for additional public comment pursuant to a court order. The court upheld the rule on all counts and issued a final order in October, 2002. Subsequently, NMFS renewed its Paperwork Reduction Act (PRA) approval, which included additional public comment on the information collection under the rule, and completed type approvals for VMS

units for the fishery. This action does not change any substantive provisions of the HMS VMS rule, but provides a new effective date, as the original date was suspended because of the court case. Further delay of this rule to provide additional opportunity for public comment is contrary to the public interest because fishing is currently underway, and VMS would facilitate efficient allocation of limited enforcement resources to meet management objectives, including time and area closures established to protect juvenile fish and protected species. U.S. Atlantic pelagic longline vessels operate in fishing areas in the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico, and given increased commitments to homeland security, VMS will play an important role in determining deployment of at-sea resources.

This rule refers to collection-of-information requirements subject to the PRA and which have been approved by OMB under control number 0648-0372. Public reporting burden for these requirements is estimated to average 4 hours for installation of equipment, 2 hours for annual maintenance of the equipment (beginning in the second year), 0.3 seconds per automated position report from the automated equipment, and 5 minutes to complete and return a one-time installation checklist. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate, or any other aspect of this data collection, including suggestions for reducing the burden, to NMFS (see **FOR FURTHER INFORMATION CONTACT**) and OMB at the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC. 20503 (Attention: NOAA Desk Officer).

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

50 CFR Part 679

[Docket No. 021122286-3036-02; I.D. 072803B]

Fisheries of the Exclusive Economic Zone Off Alaska; Northern Rockfish in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for northern rockfish in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2003 total allowable catch (TAC) of northern rockfish in this area.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), July 29, 2003, through 2400 hrs, A.l.t., December 31, 2003.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907-586-2778.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2003 TAC of northern rockfish for the Central Regulatory Area was established as 4,640 metric tons (mt) by the final 2003 harvest specifications for groundfish in the GOA (68 FR 9924, March 3, 2003).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2003 TAC for northern rockfish in the Central Regulatory Area will be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 4,390 mt, and is setting
