Magnuson-Stevens Act Provisions; Fisheries off the West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Groundfish Fishery Management Measures; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency rule; correction.

SUMMARY: This document contains corrections to the emergency rule published on January 7, 2003 for the Pacific Coast groundfish fishery.

DATES: Effective January 27, 2003 through February 28, 2003.

FOR FURTHER INFORMATION CONTACT: Jamie Goen or Carrie Nordeen (NMFS, Northwest Region), 206-526-6140.

SUPPLEMENTARY INFORMATION: The specifications and management measures for the 2003 fishing year

(January 1 through December 31, 2003) are initially being published in the **Federal Register** as an emergency rule for January 1 through February 28, 2003 (68 FR 908, January 7, 2003), and as a proposed rule for March 1 through December 31, 2003 (68 FR 936, January 7, 2003). The final rule for March 1 through December 31, 2003, will be published in the **Federal Register** after the public comment period ends on February 7, 2003.

Management measures for the Pacific Coast groundfish fishery, effective January 1 through February 28, 2003 (68 FR 908, January 7, 2003), contained errors in the trawl trip limit tables, errors in management area coordinates for both commercial and recreational fisheries, and technical errors that require correction.

The limited entry trawl trip limit table, Table 3 (North)- line 23, is corrected to clarify the yellowtail rockfish small footrope trawl trip limit north of 40°10' N. latitude (lat.). The original language was confusing, and this correction adds a section to emphasize the limits to the amount of yellowtail that can be harvested if it's not associated with flatfish. Coastwide, the whiting trip limits, Table 3 (North)- line 14 and Table 3 (South)- line 18, are corrected to allow only mid-water trawling for Pacific whiting inside the rockfish conservation area (RCA) during the primary season (May through August). This is because harvest of whiting outside of the primary season is only allowed as an incidental catch in other groundfish fisheries, which are not supposed to occur in the RCA. Regulatory language for the recreational groundfish fishery off California is corrected to prohibit the retention of bocaccio, canary rockfish, yelloweye rockfish and cowcod in the Rockfish, Cabezon, Greenling Complex (RCG Complex) bag limits south of 40°10' N. lat. This prohibition was explained in the preamble to the proposed rule, which was published in the same issue of the **Federal Register** with the emergency rule which this rule corrects. The emergency rule crossed referenced the proposed rule for the rationale for the management measures.

Coordinates for the following lines are corrected in this notice: the 50-fm (91-m) depth contour used between 40°10' N. lat. and 34°27' N. lat. as an eastern boundary for the trawl RCA in the months of January and February; the 60-fm (110-m) depth contour used between 40°10' N. lat. and 34°27' N. lat. as an eastern boundary for the trawl RCA in March through October; the 100-fm (183-m) depth contour used north of 40°10' N. lat. as an eastern
