The Proposal

The FAA is considering an amendment to the Code of Federal Regulations (14 CFR Part 71) by establishing new Class E airspace at Chevak, AK. The intended effect of this proposal is to establish Class E airspace upward from 700 ft. above the surface, to contain Instrument Flight Rules (IFR) operations at Chevak, AK.

The FAA Instrument Flight Procedures Production and Maintenance Branch has developed two new SIAPs for the Chevak Airport. The new approaches are (1) Area Navigation (Global Positioning System) (RNAV GPS) Runway (RWY) 14, original; and (2) RNAV (GPS) Runway 32, original. New Class E controlled airspace extending upward from 700 ft. above the surface within the Chevak, Alaska area would be created by this action. The proposed airspace is sufficient to contain aircraft executing the new instrument procedures for the Chevak Airport.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9K, *Airspace Designations and Reporting Points*, dated August 30, 2002, and effective September 16, 2002, which is incorporated by reference in 14

CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore —(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
