

date of a citation for violating § 57.5060 to achieve compliance, the operator shall establish and implement a written plan to control the miner's exposure. The plan shall remain in effect for a period of one year after the citation is terminated.

(b) The plan must include a description of the controls the operator will use to reduce the miner's exposure to the DPM limit.

(c) The operator must modify the plan to reflect changes in controls, mining equipment, or continuing noncompliance.

(d) The operator must retain a copy of the plan at the mine site for the duration of the plan.

5. Section 57.5071 is amended by revising the section heading and by revising paragraphs (a) and (c) to read as follows:

§ 57.5071 Exposure monitoring.

(a) Mine operators must monitor as often as necessary to effectively determine, under conditions that can be reasonably anticipated in the mine, whether the average personal full-shift airborne exposure to DPM exceeds the DPM limit specified in § 57.5060.

(c) If any monitoring performed under this section indicates that a miner's exposure to diesel particulate matter exceeds the DPM limit specified in

§ 57.5060, the operator must promptly post notice of the corrective action being taken on the mine bulletin board, initiate corrective action by the next work shift, and promptly complete such corrective action.
