#### Procedural Background

This rule is limited to the changes contained in Amendment 5 to CoC No. 1004 and does not include other aspects of the Standardized NUHOMS®-24P, -52B, and -61BT cask system design. The NRC is using the "direct final rule procedure" to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of public health and safety continues to be ensured.

Because NRC considers this action noncontroversial and routine, the proposed rule is being published concurrently as a direct final rule. The direct final rule will become effective on November 3, 2003. However, if the NRC
