**Title:** NESHAP for Perchloroethylene Dry Cleaning Facilities (40 CFR part 63, subpart M).

**Abstract:** These standards apply to owners or operators of dry cleaning facilities that use perchloroethylene (PCE). Owners or operators of such facilities must provide EPA, or the delegated State regulatory authority, with the one-time notifications and reports. The owners or operators must also perform weekly monitoring (or biweekly for the smaller facilities), and must keep records for five years. The notification and reports enable EPA or the delegated State regulatory authority to determine whether the appropriate control technology is installed and properly operated and maintained, and to schedule inspections and/or compliance assistance activities. The responses to this information collection are mandatory under Clean Air Act section 112 and 40 CFR part 63, subpart M. The responses are not anticipated to be kept confidential due to the nature of the information collected; however, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information are estimated to average approximately 1

hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Perchloroethylene Dry Cleaning Facilities.

**Estimated Number of Respondents:** 34,240.

**Frequency of Response:** Occasionally.

**Estimated Total Annual Hour Burden:** 1,537,784 hours.

**Estimated Total Capital and Operations & Maintenance (O & M) Annual Costs:** \$53,000, which includes zero annualized capital/startup costs and \$53,000 annual O&M costs.

**Changes in the Estimates:** There is an increase of 325,655 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase in burden is due to a more accurate estimate of existing and anticipated new sources. In addition, a revised hourly labor rate from the United States Department of Labor, resulted in an increase over the three-year period from the previous ICR. Since the active ICR indicated that there were 25,090 existing respondents subject to the rule over the three-year period, we conducted additional research by contacting a number of Trade Associations, and subsequently determined that the number of respondents subject to the rules addressed by this ICR is 34,240. In addition, a math error in the previous ICR was corrected.

Dated: August 12, 2003.
