The SEIS analysis is based on updated data, changes in the dewatering program, and improved hydrogeologic modeling. The draft SEIS analyzed a proposed additional water pipeline, which has been canceled, is no longer subject to analysis, and thus is not part of the final SEIS. The SEIS analyzes the potential impact of ongoing dewatering by Barrick's Goldstrike Mine, approved by the State of Nevada, and proposed dewatering by other mines along the Carlin Trend and analyzes updated mitigation measures. An abbreviated final SEIS has been produced. The abbreviated final SEIS contains copies of comment letters received on the draft SEIS, responses to those comments, and an errata section with specific modifications and corrections to the draft in response to the comments.
