Title: Section 97.213, Remote Control of a Station.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or households, business or other for-profit entities.

Number of Respondents: 500.

Estimated Time Per Response: .2 hours (12 minutes).

Frequency of Response:

Recordkeeping requirement.

Total Annual Burden: 100 hours.

Annual Reporting and Recordkeeping Cost Burden: N/A.

Needs and Uses: The recordkeeping requirement contained in section 97.213 consists of posting a photocopy of the amateur station license, a label with the name, address, and telephone number of the station licensee, and the name of at least one authorized control operator. This requirement is necessary so that quick resolution of any harmful interference problems can be identified and to ensure that the station is operating in accordance with the Communications Act of 1934, as amended. The information is used by FCC staff during inspections and investigations to assure that remotely controlled amateur radio stations are licensed in accordance with applicable rules, statutes and treaties. In the absence of this recordkeeping requirement, field inspections and investigations related to harmful interference could be severely hampered and needlessly prolonged due to inability to quickly obtain vital information about a remotely controlled station.

Annual Reporting and Recordkeeping Cost Burden: N/A.

Needs and Uses: The recordkeeping requirement contained in section 80.413 is necessary to document the number and type of transmitters operating under an on-board station license. The information is used by FCC staff during inspections and investigations to determine what mobile units and repeaters are associated with on-board stations aboard a particular vessel. If this information were not collected, no means would be available to determine if this type of radio equipment is authorized or who is responsible for its operation.
