

TABLE 17.—CLASSIFICATIONS WITHIN THE CHE POPULATION NEAR HAZARD DATA ELEMENT—Continued

Classification	Description	Score
11 to 15	• There are 11 — 15 inhabited structures located up to 2 miles from the boundary of the MRS, within the boundary of the MRS, or both.	3
6 to 10	• There are 6 — 10 inhabited structures located up to 2 miles from the boundary of the MRS, within the boundary of the MRS, or both.	2
1 to 5	• There are 1 —5 inhabited structures located up to 2 miles from the boundary of the MRS, within the boundary of the MRS, or both.	1
0	• There are no inhabited structures located up to 2 miles from the boundary of the MRS, within the boundary of the MRS, or both.	

Notes: The term inhabited structures means permanent or temporary structures, other than DoD munitions-related structures, that are routinely occupied by one or more persons for any portion of a day.

The *Types of Activities/Structures* data element is used to assess information about the population and activities near the hazard. Through this data element, DoD strives to address multiple factors, including the amount, type, the intrusiveness of activities, and the likelihood of people to congregate

onsite and within a 2-mile radius of the MRS. Consideration is made to reflect the nature of the activities that may result in an encounter with CWM. Residential and recreational areas are weighted highest to reflect the types of activities and population (e.g., children) that may be in their vicinity. In response

to Tribal comments, DoD included subsistence issues in the highest classification.

The classifications, the definition for each classification, and associated numerical scores for the *Types of Activities/Structures* element are presented in Table 18.

TABLE 18.—CLASSIFICATIONS WITHIN THE CHE TYPES OF ACTIVITIES/STRUCTURES DATA ELEMENT

Classification	Description	Score
Residential, educational, commercial, or subsistence.	• Activities are conducted or inhabited structures are located up to 2 miles from the MRS's boundary, or within the MRS's boundary that are associated with any of the following purposes; residential, educational, child care, critical assets (e.g., hospitals, fire and rescue, police stations, dams), hotels, commercial shopping centers, playgrounds, community gathering areas, religious sites or sites used for subsistence hunting, fishing, and gathering.	5
Parks and recreational areas	• Activities are conducted or inhabited structures are located up to 2 miles from the MRS's boundary or within the MRS's boundary that area associated with parks, nature preserves or other recreational uses.	4
Agricultural, forestry	• Activities are conducted or inhabited structures are located up to 2 miles from the MRS's boundary, within the MRS's boundary that are associated with agriculture or forestry.	3
Industrial or warehousing	• Activities are conducted or inhabited structures are located up to 2 miles from the MRS's boundary, within the MRS's boundary that are associated with industrial activities or warehousing.	2
No known or recurring activities	• There are no known or recurring recurring activities occurring up to 2 activities miles from the MRS's boundary or within the MRS's boundary.	1

Notes: The term inhabited structures means permanent or temporary structures, other than DoD munitions-related structures, are routinely occupied by one or more persons for any portion of a day.

Through the *Ecological and/or Cultural Resources* data element, DoD recognizes the importance of the ecological and cultural resources present on an MRS. This data element considers threatened and endangered species, critical habitat, sensitive ecosystems, natural resources, historical sites, historic properties, cultural items, archeological resources, and American Indians or Alaska Natives spiritual sites

(e.g., the MRS is deemed by American Indian or Alaska Natives to be of spiritual significance, or there are areas that are used by American Indian and Alaska Natives for subsistence activities, such as hunting or fishing). Requirements for determining if a particular feature is a cultural resource are found in the National Historic Preservation Act, Native American Graves Protection and Repatriation Act,

Archeological Resources Protection Act, Executive Order 13007, and the American Indian Religious Freedom Act. The greatest weight is awarded to MRS with both cultural and ecological resources.

The classifications, the definition for each classification, and associated numerical scores for the Ecological and/or Cultural Resources data element are presented in Table 19.

TABLE 19.—CLASSIFICATIONS WITHIN THE CHE ECOLOGICAL AND/OR CULTURAL RESOURCES DATA ELEMENT

Classification	Description	Score
Ecological and cultural resources present	• There are both ecological and cultural resources present on the MRS	5
Ecological resources present	• There are ecological resources present on the MRS	3
Cultural resources present	• There are cultural resources present on the MRS	3
