

TABLE 12.—CLASSIFICATIONS WITHIN THE CHE SOURCES OF CWM DATA ELEMENT—Continued

Classification and description	Score
Research, Development, Testing, and Evaluation (RDT&E) facility using CWM or CAIS: The MRS is at a facility that was involved in non-live fire RDT&E activities (including static testing) involving CWM, and there are CWM/DMM suspected of being present on the surface or in the subsurface	3
Training facility using CWM or CAIS: The MRS is a location that was involved 2 in training activities involving CWM and/or CAIS (e.g., training in recognition of CWA, decontamination training) and CWM/DMM are suspected of being present on the surface or in the subsurface	2
Storage or transfer points of CWM: The MRS is a former storage facility or transfer point (e.g., inter-modal transfer) for CWM	1
Evidence of no CWM: Following investigation, the physical evidence indicates that CWM are not present at the MRS, or the historical evidence indicates that CWM are not present at the MRS	0

Notes:

The notation *CWM/DMM* means CWM that are DMM.

The term *CWM/UXO* means CWM that are UXO.

Historical evidence means that the investigation: (1) Found written documents or records, or (2) documented interviews of persons with knowledge of site conditions, or (3) found and verified other forms of information.

Physical evidence means: (1) Recorded observations from on-site investigations, such as finding intact UXO or DMM, or components, fragments, or other pieces of military munitions, or (2) the results of field or laboratory sampling and analysis procedures, or (3) the results of geophysical investigations.

In the subsurface means the CWM (i.e., a DMM or UXO) is (1) Entirely beneath the ground surface, or (2) fully submerged in a water body.

On the surface means the CWM (i.e., a DMM or UXO) is: (1) Entirely or partially exposed above the ground surface, or (2) entirely or partially exposed above the surface of a water body (e.g., as a result of tidal activity).

TABLE 13.—CLASSIFICATIONS WITHIN THE CHE INFORMATION ON THE LOCATION OF CWM DATA ELEMENT

Classification and description	Score
Confirmed surface:	
Physical evidence indicates there are CWM on the surface of the MRS	25
Historical evidence (e.g., a confirmed incident report or accident report) indicates there are CWM on the surface of the MRS	25
Confirmed subsurface, active:	
Physical evidence indicates the presence of CWM in the subsurface of the MRS and the geological conditions at the MRS are likely to cause CWM to be exposed in the future by naturally occurring phenomena (e.g., drought, flooding, erosion, frost, heat heave, tidal action), or there are on-going intrusive activities (e.g., plowing, construction, dredging) at the MRS that are likely to expose CWM	20
Historical evidence indicates that CWM are located in the subsurface of the MRS and the geological conditions at the MRS are likely to cause CWM to be exposed in the future by naturally occurring phenomena (e.g., drought, flooding, erosion, frost, heat heave, tidal action), or there are on-going intrusive activities (e.g., plowing, construction, dredging) at the MRS that are likely to expose CWM	20
Confirmed subsurface, stable:	
Physical evidence indicates the presence of CWM in the subsurface of the MRS and the stable geological conditions at the MRS are not likely to cause CWM to be exposed in the future by naturally occurring phenomena, or there are no intrusive activities occurring at the MRS that are likely to either occur, or if the activities do occur, are likely to cause CWM to be exposed	15
Historical evidence indicates that CWM are located in the subsurface of the MRS and the geological conditions at the MRS are not likely to cause CWM to be exposed in the future by naturally occurring phenomena, or there are no intrusive activities occurring at the MRS that are likely to either occur, or if the activities do occur, are likely to cause CWM to be exposed	15
Suspected (physical evidence): There is physical evidence other than the documented presence of CWM, indicating that CWM may be present at the MRS	10
Suspected (historical evidence): There is historical evidence indicating that CWM may be present at the MRS	5
Subsurface, physical constraint: There is physical or historical evidence indicating the CWM may be present in the subsurface, but there is a physical constraint (e.g., pavement, water depth over 120 feet) preventing direct access to the CWM	2
Evidence of no CWM: Following investigation of the MRS, there is physical evidence there is no CWM present or there is historical evidence indicating that no CWM are present	0

Notes:

Historical evidence means that the investigation: (1) Found written documents or records, or (2) documented interviews of persons with knowledge of site conditions, or (3) found and verified other forms of information.

Physical evidence means: (1) Recorded observations from on-site investigations, such as finding intact UXO or DMM, or components, fragments, or other pieces of military munitions, or (2) the results of field or laboratory sampling and analysis procedures, or (3) the results of geophysical investigations.

In the subsurface means the CWM (i.e., a DMM or UXO) is (1) entirely beneath the ground surface, or (2) fully submerged in a water body.

On the surface means the CWM (i.e., a DMM or UXO) is (1) entirely or partially exposed above the ground surface, or (2) entirely or partially exposed above the surface of a water body (e.g., as a result of tidal activity).

The term *small arms ammunition* means solid projectile ammunition that is .50 caliber or smaller and shotgun shells.

TABLE 14.—CLASSIFICATIONS WITHIN THE CHE EASE OF ACCESS DATA ELEMENT

Classification and description	Score
No barrier: There is no barrier preventing access to all parts of the MRS (i.e., all parts of the MRS are accessible)	10
Barrier to MRS access is incomplete: There is a barrier preventing access to parts of the MRS but not the entire MRS	8
Barrier to MRS access is complete but not monitored: There is a barrier preventing access to all parts of the MRS, but there is no surveillance (e.g., by a guard) ensure that the barrier is effectively preventing access to all parts of the MRS	5
