

to implement a Saltonstall-Kennedy grant, with a final, revised submission on July 30, 2003. DMF proposes to conduct 100 tows for each design with a twin trawl net, in which the test net is rigged alongside a standard net, for 200 total tows, and limited to 200 hours of bottom-time. The experimental fishing would take place between September 1, 2003, and March 1, 2004, on Georges Bank in 30-minute squares 62–63, 79–80, 92–99, 109–114, 118–119, excluding year-round Closed Areas I and II. DMF requests exemption from the trip limit for haddock, specified at 50 CFR 648.86(a)(1), and the Georges Bank cod landing limit, specified at 50 CFR 648.86(b)(2), and requests retention of legal-sized fish for sale, with the vessel receiving the revenues as compensation for using its DAS. The participating vessel would be required to comply with applicable state landing laws and Federal commercial DAS requirements, and to report all landings on the Federal Fishing Vessel Trip Report.
