

nonzero rate of tax levied against the income of corporations organized in the United States derived from the international operation of ships or aircraft or a temporary reduction to a zero rate of tax, such as in the case of a tax holiday.

(iii) *Inbound or outbound freight tax.* With respect to the carriage of cargo, the foreign country must provide an exemption from tax for income from transporting freight both inbound and outbound. For example, a foreign country that imposes tax only on outbound freight will not be treated as granting an equivalent exemption for income from transporting freight inbound into that country.

(iv) *Exemptions for limited types of cargo.* A foreign country must provide an exemption from tax for income from transporting all types of cargo. For example, if a foreign country were generally to impose tax on income from the international carriage of cargo but were to provide a statutory exemption for income from transporting agricultural products, the foreign country would not be considered to grant an equivalent exemption with respect to income from the international carriage of cargo, including agricultural products.

(v) *Territorial tax systems.* A foreign country with a territorial tax system will be treated as granting an equivalent exemption if it treats all income derived from the international operation of ships or aircraft derived by a U.S. corporation as an entirely foreign source and therefore not subject to tax, including income derived from a voyage or flight that begins or ends in that foreign country.

(vi) *Countries that tax on a residence basis.* A foreign country that provides an equivalent exemption to corporations organized in the United States but also imposes a residence-based tax on certain corporations organized in the United States may nevertheless be considered to grant an equivalent exemption if the residence-based tax is imposed only on a corporation organized in the United States that maintains its center of management and control or other comparable attributes in that foreign country. If the residence-based tax is imposed on corporations organized in the United States and engaged in the international operation of ships or aircraft that are not managed and controlled in that foreign country, the foreign country shall not be treated as a qualified foreign country and shall not be considered to grant an equivalent exemption for purposes of this section.

(vii) *Exemptions within categories of income.* With respect to paragraphs

(h)(2)(i) through (v), (vii), and (viii) of this section, a foreign country must provide an exemption from tax for all income in a category of income, as defined in paragraph (h)(2) of this section. For example, a country that exempts income from the bareboat charter of passenger aircraft but not the bareboat charter of cargo aircraft does not provide an equivalent exemption. However, an equivalent exemption may be available for income derived from the international operation of ships even though income derived from the international operation of aircraft may not be exempt, and vice versa. With respect to paragraph (h)(2)(vi) of this section, a foreign country may be considered to grant an equivalent exemption for one or more types of income described in paragraph (g)(1) of this section.

(i) *Treatment of possessions.* For purposes of this section, a possession of the United States will be treated as a foreign country. A possession of the United States will be considered to grant an equivalent exemption and will be treated as a qualified foreign country if it applies a mirror system of taxation. If a possession does not apply a mirror system of taxation, the possession may nevertheless be a qualified foreign country if, for example, it provides for an equivalent exemption through its internal law. A possession applies the mirror system of taxation if the U.S. Internal Revenue Code of 1986, as amended, applies in the possession with the name of the possession used instead of "United States" where appropriate.

(j) *Expenses related to qualified income.* If a qualified foreign corporation derives qualified income from the international operation of ships or aircraft as well as income that is not qualified income, and the nonqualified income is effectively connected with the conduct of a trade or business within the United States, the foreign corporation may not deduct from such nonqualified income any amount otherwise allowable as a deduction from qualified income, if that qualified income is excluded under this section. See section 265(a)(1).

■ **Par. 4.** Sections 1.883–2 through 1.883–5 are added to read as follows:

§ 1.883–2 Treatment of publicly-traded corporations.

(a) *General rule.* A foreign corporation satisfies the stock ownership test of § 1.883–1(c)(2) if it is considered a publicly-traded corporation and satisfies the substantiation and reporting requirements of paragraphs (e) and (f) of this section. To be considered a publicly-traded corporation, the stock of

the foreign corporation must be primarily traded and regularly traded, as defined in paragraphs (c) and (d) of this section, respectively, on one or more established securities markets, as defined in paragraph (b) of this section, in either the United States or any qualified foreign country.

(b) *Established securities market*—(1) *General rule.* For purposes of this section, the term *established securities market* means, for any taxable year—

(i) A foreign securities exchange that is officially recognized, sanctioned, or supervised by a governmental authority of the qualified foreign country in which the market is located, and has an annual value of shares traded on the exchange exceeding \$1 billion during each of the three calendar years immediately preceding the beginning of the taxable year;

(ii) A national securities exchange that is registered under section 6 of the Securities Act of 1934 (15 U.S.C. 78f);

(iii) A United States over-the-counter market, as defined in paragraph (b)(4) of this section;

(iv) Any exchange designated under a Limitation on Benefits article in a United States income tax convention; and

(v) Any other exchange that the Secretary may designate by regulation or otherwise.

(2) *Exchanges with multiple tiers.* If an exchange in a foreign country has more than one tier or market level on which stock may be separately listed or traded, each such tier shall be treated as a separate exchange.

(3) *Computation of dollar value of stock traded.* For purposes of paragraph (b)(1)(i) of this section, the value in U.S. dollars of shares traded during a calendar year shall be determined on the basis of the dollar value of such shares traded as reported by the International Federation of Stock Exchanges located in Paris, or, if not so reported, then by converting into U.S. dollars the aggregate value in local currency of the shares traded using an exchange rate equal to the average of the spot rates on the last day of each month of the calendar year.

(4) *Over-the-counter market.* An over-the-counter market is any market reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers that regularly disseminates quotations of stocks and securities by identified brokers or dealers, other than by quotation sheets that are prepared and distributed by a broker or dealer in the regular course of business and that
