I. Background of Small MWC Regulations and Affected Facilities

On December 6, 2000, EPA promulgated emission guidelines for existing small municipal waste combustion units (40 CFR part 60, subpart BBBBB). Existing small MWC units are those units for which construction was commenced on or before August 30, 1999. States with existing small MWC units subject to the emission guidelines are required to submit to EPA a plan that implements and enforces the subpart BBBBB emission guidelines within 1 year after promulgation of the emission guidelines, or by December 6, 2001. Section 129(b)(3) of the Act requires EPA to develop, implement, and enforce a Federal plan for small MWC units located in States that have not submitted an approvable plan within 2 years after promulgation of the guidelines, or by December 6, 2002. This action promulgates a Federal plan for small MWC units that are not covered by an EPA approved and effective State or Tribal plan. The small MWC Federal plan will become effective on December 6, 2002. The

elements of the Federal plan are summarized in section II of this preamble.

A. Background of Small MWC Regulations

On December 19, 1995, EPA promulgated emission guidelines (40 CFR part 60, subpart Cb) for large and small MWC units. In 1997, the U.S. Court of Appeals for the D.C. Circuit vacated the emission guidelines as they applied to small MWC units (*Davis County Solid Waste Management and Recovery District v. EPA*, 108 F. 3d 1454, D.C. Cir.1997). After this decision, EPA repropose and promulgated emission guidelines for small MWC units (40 CFR part 60, subpart BBBBB, promulgated on December 6, 2000). States or tribes with existing large MWC units subject to the subpart Cb emission guidelines were required to submit to EPA a State or tribal plan for those large units by December 19, 1996. To regulate large MWC units in areas without approved and effective State or tribal plans, EPA promulgated a Federal plan for large units (40 CFR part 62, subpart FFF) on November 12, 1998. The subpart FFF Federal plan and previously submitted State plans apply to only large MWC units. A separate Federal plan and separate State plans are required to implement the subpart BBBBB emission guidelines for small MWC units. The Federal plan for small MWC units was proposed on June 14, 2001.

B. Regulated Entities

The small MWC Federal plan affects existing small MWC units that are not
