RIN 1904-AB10

Energy Conservation Program for Consumer Products: Test Procedure for Dishwashers

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule.

SUMMARY: Under Part B of title III of the Energy Policy and Conservation Act (EPCA or the Act), the Department of Energy (DOE or the Department) promulgates a rule amending its test procedure to determine the energy

efficiency of residential dishwashers. This amendment provides a new test procedure for testing the energy consumption of soil-sensing models, requires that manufacturers or private labelers include the measurement of standby power consumption in the estimated annual operating cost and estimated annual energy use calculations for all dishwasher models, and adds new specifications for instrumentation requirements. It also revises the number of cycles per year used for calculating the estimated annual operating cost, based on new survey data concerning consumer practices.

EFFECTIVE DATES: This rule is effective September 29, 2003. The incorporation by reference of certain publications listed in this rule is approved by the Director of the Federal Register as of September 29, 2003.
