

computer requirements, a presence on the Internet's World Wide Web and shall maintain appropriate computer and network security precautions during all periods of funding by MBDA. All IT requirements, as described herein, shall be met within thirty (30) calendar days after the award.

1. *Network Design:* At all locations where services are delivered to the eligible public as defined by Executive Order 11625, the recipient shall operate a "Client-Server" configured local area network (LAN) enabling each staff person delivering services to the eligible public exclusive access to a personal computer workstation during all business hours. MBDA shall, from time to time, designate certain configurations of the enterprise hardware and software to meet interface requirements.

Currently, MBDA recommends servers using an operating system that is *fully compatible* with Microsoft Windows 2000 with a service pack three (3) or greater. Domain Controller (DC) servers or any server providing principal service to the desktops shall contain 18 or more gigabytes (GB) of hard drive space using two or more 9 GB+ disks configured appropriately to ensure data retention should one disk fail. At least one (1) Pentium IV central processing unit (CPU), or a CPU ensuring similar speed, shall be used in the DC server or any other server providing principal service to the desktops. Web servers, mail servers and/or servers maintained by a third party such as an Internet Service Provider (ISP) shall meet the minimum server specifications as stated herein. A "trusted" relationship, as appropriate, shall be established and maintained between the MBDA DC server and those operated by, or operated for, the recipient to ensure access by MBDA system administration personnel during normal business hours. (In a network that consists of two or more domains, each domain acts as a separate network with its own accounts database. Even in the most rigidly stratified organizations, some users in one domain will need to use some or all of the resources in another domain. The usual solution to confirming user access levels among domains is what's called a trust relationship.) From time to time, MBDA will require access to servers and desktop workstations after business hours and on holidays and weekends. For this purpose, the recipient shall ensure appropriate communications links are active and appropriate personnel on station, upon 24-hour notice from MBDA.

2. *Desktop Workstations:* All desktop systems shall not be more than two (2)

calendar years old at time of award and shall contain a Pentium IV central processing unit (CPU), or a CPU ensuring similar speed, operating at speeds not less than 2+ Gigahertz (GHz). Each desktop system shall contain a hard drive with a storage capacity of at least twenty (20) GB and 512 Megabytes of RAM. All desktop systems shall have installed an operating system fully compatible with Microsoft Windows 2000 with MS Office 2000 Professional (SP1) or higher, Microsoft Internet Explorer 6.x as well as some form of regularly updated antivirus protection software. Additionally, it is suggested that at least one workstation have installed both a full page scanner and feed, along with software fully compatible with Adobe Acrobat software for the production of electronic document submissions.

Since workstations may be linked to a live, two-way conference connection with potential clients, at least 50% of all employee workstations shall be fully operational with a qualified staff person positioned at the keyboard during all business hours to include lunch and break periods.

3. *Maintenance and Security:* A network map ("as-built") reflecting adherence to the computer and networking requirements set forth herein shall be maintained by the recipient for review by MBDA at any time. Each recipient shall designate and train one administrative person competent in the operation of an operations system fully compatible with Windows 2000 network and local area network (LAN) technology as described herein. If a firewall, proxy server or similar security component is used, MBDA's server shall be "trusted" for full access to all files relevant for network and administrative operations. From time to time, MBDA may require certain software be loaded on servers and desktops. In any given year, the cost of this additional software may be \$200.00 per workstation and \$500.00 per server, such additional cost may be borne by MBDA. Every employee of the NABDC shall be assigned a unique username and password to access the system. Every employee shall be required to sign a written computer security agreement. (A suggested format for the computer security agreement will be provided at the time of award.) Every manager, employee, and contractor and any other person given access to the computer system shall sign the security agreement and an original copy of the signed agreement shall be kept in the NABDC's files. A photocopy of the agreement shall be sent by fax to MBDA at: (202) 482-2693 no later than

thirty (30) days after receipt of the award. All subsequent new hires and associations requiring access to the NABDC or MBDA systems shall read, understand and sign the security agreement prior to issuance of a password. No employee shall have access to the MBDA system without a signed security agreement on file at MBDA.

4. *Web site:* Each recipient shall create and maintain a public web site using a unique address (e.g., <http://www.center-name.com>). The first page (Index page) of the web site shall clearly identify the recipient as a Native American Business Development Center funded by the U.S. Department of Commerce's Minority Business Development Agency. The Index page of the web site shall load on software fully compatible with Windows Internet Explorer 6.x browser software using a normal home computer with 56Kb/s analog phone line connection in less than ten (10) seconds. The web site shall contain the names of all managers and employees, the business and mailing address of the Center, business phone and fax numbers and email addresses of the NABDC and employees, a statement referencing the services available at the NABDC, the hours under which the NABDC operates and a link to the MBDA homepage (<http://www.mbda.gov>). For purpose of electronically directing clients to the appropriate NABDC staff, the web site shall also contain a short biographical statement for each employee of the NABDC including management, contractors, part-time, full-time, and non-paid (volunteer) personnel, providing services directly to the eligible public under an award from MBDA. This biographical statement shall contain: the full name of the employee, and a brief description of the expertise of the employee to include academic degrees, certifications and any other pertinent information with respect to that employee's qualifications to deliver minority business assistance services to eligible members of the public.

No third party advertising of commercial goods and services shall be permitted on the site. All links from the site to other than federal, state or local government agencies and non-profit educational institutions must be requested, in advance and in writing, through the Chief Information Officer, MBDA Office of Information Technology Services to the Grants Office for written approval. Such approval shall not be unreasonably withheld but approval is subject to withdrawal if MBDA determines the linked site unsuitable. No employee of
