

control technology (RACT). KCAPCD is a PM-10 maintenance attainment area that was previously PM-10 moderate nonattainment. The *PM-10 Attainment Demonstration Maintenance Plan and Redesignation Request*, KCAPCD (September 5, 2003) does not rely on Rule 417 for attainment, therefore fulfilling RACM/RACT is not required.

Major NO<sub>x</sub> sources in severe ozone nonattainment areas are required to adopt Reasonably Available Control Technology (RACT) (see sections 182(a)(2)(A) and 182(f)). SJVUAPCD is a severe ozone nonattainment area and must fulfill the requirements of RACT.

The following guidance documents were used for reference:

- *Requirements for Preparation, Adoption, and Submittal of Implementation Plans*, U.S. EPA, 40 CFR part 51.
- *General Preamble Appendix C3—Prescribed Burning Control Measures* (57 FR 18072, April 28, 1992).
- *Prescribed Burning Background Document and Technical Information Document for Best Available Control Measures* (EPA-450/2-92-003).
- *General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990*, 57 FR 13498, 13540 (April 16, 1992).
- *PM-10 Attainment Demonstration Maintenance Plan and Redesignation Request*, KCAPCD (September 5, 2003).
- *Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations*, U.S. EPA (May 25, 1988) (the Bluebook).
- *State Implementation Plans; Nitrogen Oxides Supplement to the General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990* (the “NO<sub>x</sub> Supplement to the General Preamble”), U.S. EPA, 57 FR 55620 (November 25, 1992).
- *Guidance Document for Correcting Common VOC & Other Rule Deficiencies*, U.S. EPA Region IX (August 21, 2001) (the Little Bluebook).

#### B. Do the Rules Meet the Evaluation Criteria?

We believe the rules are consistent with the relevant policy and guidance regarding enforceability, SIP relaxations, and fulfilling RACM/RACT or RACT requirements.

The TSDs have more information on our evaluation.

#### C. Public Comment and Final Action

As authorized in section 110(k)(3) of the CAA, EPA is fully approving the submitted rules because we believe they fulfill all relevant requirements. We do not think anyone will object to this, so we are finalizing the approval without

proposing it in advance. However, in the Proposed Rules section of this **Federal Register**, we are simultaneously proposing approval of the same submitted rules. If we receive adverse comments by October 6, 2003, we will publish a timely withdrawal in the **Federal Register** to notify the public that the direct final approval will not take effect and we will address the comments in a subsequent final action based on the proposal. If we do not receive timely adverse comments, the direct final approval will be effective without further notice on November 3, 2003. This will incorporate these rules into the federally-enforceable SIP.

Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this direct final rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

#### III. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a “significant regulatory action” and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have

substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 *note*) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 3, 2003. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality
