

comments (*i.e.*, a substantiation). EPA then considers the business's comments in determining whether the previously submitted information should be protected as CBI. This renewal ICR relates to the collection of information that will assist EPA in determining whether previously submitted information is entitled to confidential treatment.

EPA is proposing to use an updated Request for Substantiation letter ("proposed letter"). The proposed letter is made up of two separate sample letters that address different factual situations: Sample Letter A, which requests a substantiation in response to a FOIA request, and Sample Letter B, which requests a substantiation in support of Agency rulemaking or litigation, in the case of an advance confidentiality determination, or for any other Agency purpose. The use of two letters is a clarification of existing EPA procedures. Some of the information requested differs slightly from the current Request for Substantiation letter, concerning the possible voluntary nature of the submission and the issue of substantial competitive harm, and takes into account the vast amount of information now available electronically. Nevertheless, EPA estimates that the overall burden to respond to inquiries contained in the proposed letter is the same as the burden to respond to inquiries contained in the current Request for Substantiation letter.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average approximately 5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*The total annual hour and cost burden for all substantiations is as follows:*

**Respondents/Affected Entities:** Business and other for profit organizations.

**Estimated Number of Respondents:** 1101.

**Frequency of Response:** On occasion.  
**Estimated Total Annual Hour Burden:** 6,521 hours.

**Estimated Total Annual Capital and Operations and Maintenance Cost:** \$0.

**Changes in the Estimates:** These estimates show an increase of approximately 89 hours and \$27,973 in the total estimated burden from the figures currently identified in the OMB Inventory of Approved ICR Burdens. The increase in the burden hour estimate results from an adjustment to incorporate 0.20 hours per substantiation request for an attorney to review the request. The increase in cost burden results from this small increase in the hour estimate and from updated hourly wages for private industry and Agency employees.
