

value of imported grapefruit ranged from \$902,000 in 1998 to \$2,018,000 during the 2002 season. Using these numbers, all grapefruit importers may be classified as small entities. The majority of Florida grapefruit and Valencia and other late type orange producers may also be classified as small entities.

This rule removes seeded grapefruit from regulation under the order. Handlers of seeded grapefruit will no longer be required to meet the minimum grade and size requirements and will not be subject to assessments and reporting requirements. Removing these varieties from the minimum grade and size requirements will have no significant impact on the grapefruit market. This rule also reduces the minimum grade requirements for domestic shipments of fresh Valencia and other late type oranges from U.S. No. 1 to U.S. No. 2 external grade from June 15 to July 31 each season. This rule will help maximize shipments and returns for fresh Valencia and other late type oranges.

Sections 905.51 and 905.52 of the order authorize the committee to recommend minimum grade and size regulation to USDA. Section 905.306 of the order's rules and regulation specifies the regulation period and the minimum grade and size requirements for different varieties of fresh Florida citrus. The Committee unanimously recommended this action at a meeting on July 1, 2003.

During the 2002–2003 season, only 150 cartons of seeded grapefruit were shipped out of a total of 28.3 million $\frac{4}{5}$ bushel cartons of seedless grapefruit. Production of seeded varieties has declined as newer seedless varieties have been developed and planted. Current market share and shipment levels justify removal of the order requirements for seeded grapefruit.

Valencia and late type oranges have difficulty meeting grade requirements late in the season. At the end of the season, growers still have a limited volume of unharvested Valencia and late type oranges. The volume of fruit remaining after June 15 is small, averaging less than 5 percent of the crop over the last 5 years. The committee believes permitting the shipment of a U.S. No. 2 external grade with a minimum U.S. No. 1 internal grade from June 15 to July 31 for domestic shipments will help the industry maximize fresh shipments and returns for Valencia and other late type oranges.

This rule is expected to have a positive impact on affected entities as it relaxes handling requirements. With this rule removing seeded grapefruit from the varieties regulated, handlers

will be able to market these varieties free from order requirements. In addition, the relaxation in grade requirements from June 15 to July 31 each season for Valencia and other late type oranges will allow handlers to make additional supplies available for the fresh domestic market, thus, increasing returns. No additional costs are imposed on growers, handlers, and importers with this rule. The benefits derived from this change are expected to benefit both large and small entities equally.

During the period January 1 through December 31, 2002, imports of grapefruit totaled 23,246 metric tons (approximately 1,100,000 cartons). The Bahamas were the principal source, accounting for nearly 99 percent of the total. Remaining imports were supplied by Israel. Most imported grapefruit enters the United States from October through May.

Section 8e of the Act provides that when certain domestically produced commodities, including grapefruit, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality and maturity requirements. Because this rule changes the requirements for domestic seeded grapefruit shipments, this change must also be applicable to imported grapefruit. This rule removes the import requirements for seeded grapefruit. This regulation will benefit importers to the same extent that it benefits Florida grapefruit producers and handlers.

One alternative to this action was to make no changes to the order's handling regulations. However, the committee believes seeded grapefruit varieties have no significant impact on the grapefruit market and that action should be taken to remove them from the handling regulations. In addition, the committee believes making additional supplies of oranges available late in the season may increase returns. Therefore, the alternative of making no changes was rejected.

This rule will not impose any additional reporting or recordkeeping requirements on either small or large citrus handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. In addition, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

Further, the Committee's meeting was widely publicized throughout the citrus industry and all interested persons were invited to attend the meeting and

participate in Committee deliberations. Like all Committee meetings, the July 1, 2003, meeting was a public meeting and all entities, both large and small, were able to express their views on this issue. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <http://www.ams.usda.gov/fv/moab.html>. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

This rule invites comments on the removal of seeded grapefruit from requirements currently prescribed under the marketing order for Florida citrus and the grapefruit import regulation. This rule also invites comments on the relaxation of minimum grade requirements for fresh Valencia and other late type oranges. Any comments received will be considered prior to finalization of this rule.

After consideration of all relevant material presented, including the Committee's recommendation, and other information, it is found that this interim final rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

In accordance with section 8e of the Act, the United States Trade Representative has concurred with the issuance of this rule.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) Handlers will begin shipments of seeded grapefruit in mid-September 2003 and the removal of regulations should be effective by that time; (2) the committee recommended these changes at a public meeting and interested parties had an opportunity to provide input; and (3) this rule provides a 60-day comment period and any comments received will be considered prior to finalization of this rule.
