SUPPLEMENTARY INFORMATION:

Title: Veterinary Accreditation Program.

OMB Number: 0579-0032.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is responsible for, among other things, protecting the health of our Nation's livestock and poultry populations by preventing the spread of contagious, infectious, or communicable diseases of livestock and poultry and for eradicating such diseases from the United States when feasible.

However, because APHIS does not have sufficient personnel to perform all necessary animal disease prevention activities, we rely heavily on assistance from veterinarians in the private sector.

Veterinary Services (VS), APHIS, administers the Veterinary Accreditation Program that authorizes private veterinary practitioners to work cooperatively with VS, as well as with State animal health officials, to carry out regulatory programs that ensure the health of the Nation's livestock and poultry.

Operating this program requires us to engage in a number of information gathering activities, including:

- Conducting veterinary accreditation orientation and training.
- Completing animal health certificates.
- Applying and removing official seals.
- Completing test reports.
- Reviewing applications for veterinary accreditation and reaccreditation.
- Recordkeeping.
- Updating information on accredited veterinarians.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.
