

adoption of rules to control this source category.

D. *Utah*: On April 23, 2002, the State of Utah submitted to EPA a negative declaration regarding the need for a regulation covering CISWIs. The Utah Department of Environmental Quality (DEQ) evaluated the applicability criteria in the final emission guidelines (40 CFR part 60, subpart DDDD), searched existing source permitting files, and conducted a review of facilities in Utah in conjunction with the Division of Solid and Hazardous Waste. In addition, the DEQ examined the landfill sources in Utah and found that none are operating CISWI units. EPA examined the State's negative declaration and agrees there are no unregulated CISWIs in Utah which would require the adoption of rules to control this source category.

E. *Wyoming*: On December 16, 2002, the State of Wyoming submitted to EPA a negative declaration regarding the need for a regulation covering CISWIs. The Wyoming Department of Environmental Quality evaluated the applicability criteria in the final emission guidelines (40 CFR part 60, subpart DDDD) and reviewed their inventory of sources located in the State. EPA examined the State's negative declaration and agrees there are no unregulated CISWIs in Wyoming which would require the adoption of rules to control this source category.

If a new source chooses to locate in Colorado, Montana, North Dakota, South Dakota, Utah, or Wyoming, it would be required to comply with the New Source Performance Standard (NSPS) published for CISWIs on December 1, 2000 (65 FR 75338). If, at a later date, an existing CISWI unit is identified in a State for which a negative declaration has been made, a Federal Implementation Plan implementing the emission guidelines contained in subpart DDDD will automatically apply to that CISWI unit until a State plan is approved.

X. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by

state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing 111(d)/129 plan submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a 111(d)/129 plan submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a 111(d)/129 plan submission, to use VCS in place of a 111(d)/129 plan submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. section 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. section 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 17, 2003. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 62

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: September 2, 2003.

Robert E. Roberts,

Regional Administrator, Region 8.

■ 40 CFR part 62 is amended as follows:

PART 62—[AMENDED]

■ 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401-7671.

Subpart G—Colorado

■ 2. Add a new undesignated center heading and § 62.1380 to subpart G to read as follows:
