II. Background

A. What Action is the Agency Taking?

The Agency has issued a RED for the pesticide active ingredient dinocap. Under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1988, EPA is conducting an accelerated reregistration program to reevaluate existing pesticides to make sure they meet current scientific and regulatory standards. The RED for dinocap consists of a voluntary cancellation of all products registered in the U.S. Because the registrant, Dow AgroSciences, LLC, has expressed interest in retaining existing tolerances for apples and grapes for import purposes, the RED presents only a dietary risk assessment for those uses and specifically addresses the data requirements for support of the import

tolerances. The RED also provides background information on the pesticide registration, reregistration and tolerance reassessment, an overview of the uses and health effects associated with dinocap and a summary of what data are required to support the tolerances on apples and grapes imported into the U.S., in the absence of a U.S. registration.

The reregistration program is being conducted under congressionally mandated time frames, and EPA recognizes both the need to make timely reregistration decisions and to involve the public. Therefore, EPA is issuing this RED for dinocap as a final document with a 30-day public comment period that is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. If any comment significantly affects this RED, EPA will amend the RED by publishing the amendment in the **Federal Register**.

B. What Is the Agency's Authority for Taking This Action?

The legal authority for this RED falls under FIFRA, as amended in 1988 and 1996. Section 4(g)(2)(A) of FIFRA directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products, and either reregistering products or taking "other appropriate regulatory action."
