SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a document entitled "Guidance for Industry: Revised Recommendations for the Assessment of Donor Suitability and Blood Product Safety in Cases of Suspected Severe Acute Respiratory Syndrome (SARS) or Exposure to SARS," dated September 2003. The guidance provides revised recommendations to blood establishments for assessing donor suitability and blood product safety with respect to SARS. The guidance document applies to Whole Blood and blood components intended for

transfusion (including red blood cells for immunization) and blood components including recovered plasma, Source Leukocytes and Source Plasma intended for use in further manufacturing into injectable products or noninjectable products. FDA developed the recommendations in the guidance in consultations with other public health service agencies of the Department of Health and Human Services. The guidance announced in this document supersedes the document entitled "Guidance for Industry: Recommendations for the Assessment of Donor Suitability and Blood Product Safety in Cases of Suspected Severe Acute Respiratory Syndrome (SARS) or Exposure to SARS," dated April 2003 (68 FR 20015, April 23, 2003).

The guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the agency's current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirement of the applicable statutes and regulations.

II. Comments

The agency is soliciting public comment, but is implementing this guidance immediately. The agency has determined that prior public participation is not appropriate or feasible because there is an immediate need for clarification concerning whether FDA recommends that establishments continue to screen donors on the basis of travel to SARS-affected areas during time periods when the Centers for Disease Control has identified no areas as currently affected by SARS. Interested persons may, at any time, submit written or electronic comments to the Division of Dockets Management (see **ADDRESSES**) regarding this guidance. Submit a single copy of electronic comments or two paper copies of any mailed comments, except individuals may submit one paper copy. Comments are to be identified with the docket number found in the brackets in the heading of this document. A copy of the guidance and received comments are available for public examination in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at either <http://www.fda.gov/cber/guidelines.htm> or <http://www.fda.gov/ohrms/dockets/default.htm>.

Dated: September 12, 2003.

Jeffrey Shuren,

Assistant Commissioner for Policy.
