

the Alaska Regional Director, National Park Service; the Alaska State Director, Bureau of Land Management; the Alaska Regional Director, Bureau of Indian Affairs; and the Alaska Regional Forester, USDA Forest Service. Through the Board, these agencies participate in the development of regulations for Subparts A, B, and C, which establish the program structure and determine which Alaska residents are eligible to take specific species for subsistence uses, and the annual Subpart D regulations, which establish seasons, harvest limits, and methods and means for subsistence take of species in specific areas. Subpart D regulations for the 2003 fishing seasons, harvest limits, and methods and means were published on February 12, 2003 (68 FR 7276). Because this rule relates to public lands managed by an agency or agencies in both the Departments of Agriculture and the Interior, identical closures and adjustments would apply to 36 CFR part 242 and 50 CFR part 100.

The Alaska Department of Fish and Game (ADF&G), under the direction of the Alaska Board of Fisheries (BOF), manages sport, commercial, personal use, and State subsistence harvest on all lands and waters throughout Alaska. However, on Federal lands and waters, the Federal Subsistence Board implements a subsistence priority for rural residents as provided by Title VIII of ANILCA. In providing this priority, the Board may, when necessary, preempt State harvest regulations for fish or wildlife on Federal lands and waters.

These adjustments are necessary because of the need to maintain the viability of salmon stocks based on in-season run assessments and to provide opportunity for subsistence harvest in the Copper River. These actions are authorized and in accordance with 50 CFR 100.19(d-e) and 36 CFR 242.19(d-e).

#### *Copper River—Chitina Subdistrict*

In December 2001, the Board adopted regulatory proposals establishing a new Federal subsistence fishery in the Chitina Subdistrict of the Copper River. This fishery is open to Federally qualified users having customary and traditional use of salmon in this Subdistrict. The State conducts a personal use fishery in this Subdistrict that is open to all Alaska residents.

Management of the fishery is based on the numbers of salmon returning to the Copper River. A larger than predicted salmon run will allow additional fishing time. A smaller than predicted run will require restrictions to achieve upriver passage and spawning escapement

goals. A run that approximates the pre-season forecast will allow fishing to proceed similar to the pre-season schedule with some adjustments made to fishing time based on in-season data. Adjustments to the preseason schedule are expected as a normal function of an abundance-based management strategy. State and Federal managers, reviewing and discussing all available in-season information, will make these adjustments.

While Federal and State regulations currently differ for this Subdistrict, the Board indicated that Federal in-season management actions regarding fishing periods were expected to mirror State actions. The State established a preseason schedule of allowable fishing periods based on daily projected sonar estimates. That preseason schedule is intended to distribute the harvest throughout the salmon run and provide salmon for upriver subsistence fisheries and the spawning escapement. The Board initially closed the salmon season until the first open period scheduled for June 7, 2003, at 8 a.m. through Sunday, June 8, 8 p.m.

In the first action of this notice, a new open period for the taking of salmon was established from 8 a.m. on July 15 to 11:59 p.m. on July 20, 2003. A slightly larger than anticipated sockeye run allowed the Board to open the season to continuous harvest for an additional 136 hours.

The second action of this notice was an opening effective from 12:01 a.m. July 22 to 11:59 p.m. July 27, 2003. Based on the run strength to date, this opening had been anticipated.

The third action of this notice was an opening effective at 12:01 a.m. July 31 to 11:59 p.m. August 3, 2003. This was predicated on a lower than expected subsistence harvest with no need to further restrict subsistence users.

The normal open period started on August 4, 2003, and continues until closure on September 30, 2003. State personal use and Federal subsistence fisheries in this Subdistrict close simultaneously by regulation on September 30, 2003. No deviation from this date is anticipated.

The Board finds that additional public notice and comment requirements under the Administrative Procedure Act (APA) for these adjustments are impracticable, unnecessary, and contrary to the public interest. Lack of appropriate and immediate conservation measures could seriously affect the continued viability of fish populations, adversely impact future subsistence opportunities for rural Alaskans, and would generally fail to serve the overall public interest. Therefore, the Board

finds good cause pursuant to 5 U.S.C. 553(b)(3)(B) to waive additional public notice and comment procedures prior to implementation of these actions and pursuant to 5 U.S.C. 553(d)(3) to make this rule effective as indicated in the **DATES** section.

#### **Conformance with Statutory and Regulatory Authorities**

##### *National Environmental Policy Act Compliance*

A Final Environmental Impact Statement (FEIS) was published on February 28, 1992, and a Record of Decision on Subsistence Management for Federal Public Lands in Alaska (ROD) was signed April 6, 1992. The final rule for Subsistence Management Regulations for Public Lands in Alaska, Subparts A, B, and C (57 FR 22940–22964, published May 29, 1992) implemented the Federal Subsistence Management Program and included a framework for an annual cycle for subsistence hunting and fishing regulations. A final rule that redefined the jurisdiction of the Federal Subsistence Management Program to include waters subject to the subsistence priority was published on January 8, 1999 (64 FR 1276).

##### *Compliance With Section 810 of ANILCA*

The intent of all Federal subsistence regulations is to accord subsistence uses of fish and wildlife on public lands a priority over the taking of fish and wildlife on such lands for other purposes, unless restriction is necessary to conserve healthy fish and wildlife populations. A Section 810 analysis was completed as part of the FEIS process. The final Section 810 analysis determination appeared in the April 6, 1992, ROD which concluded that the Federal Subsistence Management Program, under Alternative IV with an annual process for setting hunting and fishing regulations, may have some local impacts on subsistence uses, but the program is not likely to significantly restrict subsistence uses.

##### *Paperwork Reduction Act*

The adjustment and emergency closures do not contain information collection requirements subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995.

##### *Other Requirements*

The adjustments have been exempted from OMB review under Executive Order 12866.

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires
